Tomlinson,2015-11-07 The Hitchhiker in Time columns were the single most popular things ever written by Shawn M Tomlinson which honestly doesn t say all that much All together they appeared in fewer than 10 newspapers between 1988 and 2001 Well multiple copies of those newspapers of course The highest circulation was approximately 40 000 so not exactly Bob Greene levels Still Tomlinson had a following with these columns and to a great extent they hold up well today Either that or Tomlinson would like to think so Many of these columns appeared in chapbooks over the years but this is the first full collection of them to be in print *War and the Arc of Human Experience* Glenn Petersen,2021-05-20 Glenn Petersen flew seventy combat missions in Vietnam when he was nineteen launching from an aircraft carrier in the Tonkin Gulf He d sought out the weighty responsibilities and hazardous work But why What did the cultural architecture of the society he grew up in have to do with the way he went to war In this book he looks at the war from an anthropological perspective because that s how he s made his living in all the subsequent years it s how he sees the world While anthropologists write about the military and war these days they do so from the perspective of researchers What makes this a fully original contribution is that Petersen brings to the page the classic methodology of ethnographers participant observation a kind of total immersion He writes from the dual perspectives of an insider and a researcher and seeks in the specifics of lived experience some larger conclusions about humans social lives in general Petersen was long oblivious to what had happened to him in Vietnam and he fears that young men and women who ve been fighting the US military s wars in Afghanistan and Iraq might be similarly unaware of what s happened to them Skills that allowed him to survive in combat in particular his ability to focus tightly on the challenges directly in front of him seemed to transfer well to life after war The same intensity led him to a successful academic career including the time he represented the Micronesian islands at the United Nations how could anything be wrong Then surreptitiously the danger the stress and the trauma he d hidden away broke through a brittle shell and the war came spilling out As an anthropologist he sees in this a classic pattern an adaptation to one set of conditions is put to a new and practical use when conditions change but in time what had once been beneficial turns into maladaptive behavior In writing about why we fight he shed lights on what the fighting does to us
