### Description

EST's Q224 QuickStart life safety control panel provides complete dual and intelligent addressable circuits in a single intelligent control panel. Designed for easy setup and simple installation, QuickStart lives up to its name in every respect. Q224's exclusive QuickStart setup function, and the option of configuring the

panel using conventional host panel programming or from a PC, makes short work of system setup. Device names can be in any language, thanks to Q224's built-in barcode scanner port. A simple pass of the optional scanner is all it takes to store device information in the QuickStart database. The scanner can also be used for quick and easy test entry when sending system messages.

Q224's setup routine is deceptively simple, considering the system's robust features and broad capacity. Supporting up to 1,000 intelligent detectors and modules, Q224 takes full advantage of EST's exclusive Signature Series technology, which includes electronic addressing, automatic device mapping, environmental compensation, multi-beam detector lock.

As a hybrid system, Q224 combines Signature Series support along with up to 98 conventional Class B or a combination of 48 Class A and Class B initiating circuits. Compatible with either two- or four-wire detectors, these circuits also provide built-in support for EST's EC family of conventional detectors.

QuickStart is designed to leave plenty of room for system expansion. Option cards make it easy to access the Q224 mounting rails. Three cards format a 4-line, 16-character message and additional system capacity. The Q224 also supports as many as eight remote annunciators and up to 64 programmable front panel modules with dual LEDs for system control and display.

Q224 is as simple to operate as it is to set up. Its large 14-line backlit LCD display provides easy-to-understand details, including up to 1,000 system events, while bright green status LEDs and large tactile control buttons present the user with a clear, at-a-glance interface. Four password levels, dual control and information screens for authorized personnel, a priority access key method gives Level 2 access, without a password, to management and service personnel.
