Ethics Law And Aging Review Volume 7 Ethics Law And Aging Review Volume 7:

Ethics, Law, and Aging Review, Volume 7 Marshall B. Kapp, 2001-09-24 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients In this volume professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place The benefits and costs of litigious legislative and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated Most important chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals **Ethics, Law, and Aging Review**, 2002 **Ethics, Law, And Aging Review, Volume 8** Marshall B. Kapp, 2002-07-31 Perplexing ethical questions emerge when conducting research involving older adult participants Fundamental ethical concerns often grappled with include the ability to obtain truly voluntary and competent informed consent the proper role of surrogate decision making in the research context and the equitable selection of research subjects This volume brings to the forefront a discussion of how to encourage essential research specifically designed to benefit older persons while protecting the legal and ethical rights of actual and potential older research participants Highly qualified and diverse contributors analyze and explain some of the most salient and legal conundrums implicated in the design conduct interpretation and application of research protocols that touch on these problems of aging and the aged **Ethics, Law, and Aging Review, Volume 7** Marshall B. Kapp, 2001-09-24 This book discusses both the real and perceived legal liability context within which health and human service delivery to older persons takes place The benefits and costs of litigious legislative and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated **Ethical Decision Making in Nursing and Healthcare** Gladys L. Husted, James H. Husted, 2001-09-10 Useful for nurses physicians and allied health professionals this book provides a systematic approach to bioethical decision making that can help clarify issues in situations where right and wrong may not be clearly defined It includes tips for educators chapters on applications for administrators and researchers and advanced directives **Lessons in Law and Aging** Marshall B. Kapp, 2001 Each chapter provides excerpts from statutes and regulations judicial opinions literature commentary case examples and suggested resources **Focus on Consumer-directed Care and Older Persons** Marshall B. Kapp, 2000 Chapters address the effects of the changes within health and long term care delivery and financing as they evolve from a regulatory command and control paradigm to a combination of models in which the individual patient consumer is more empowered to make personal choices **Controllable Artificial Intelligence and the Future of Law** Hugo Luz dos Santos, 2025-11-08 This book broaches the newly crafted concept of algorithmic dictatorship that draws on a plethora of human biases that creep into

the algorithm and feeds into an automated decision that comes to the expense of citizens lives freedoms health property fair lending and credit scoring This book sheds a keen light on the slew of reasons in view of which artificial intelligence should be both interpretable and controllable as opposed to merely explainable The reason for that is straightforward the skewed data baked into the bigoted algorithms machine biases spawns harrowing effects with which criminal justice has been grappling for a long haul drawn out Tallyingly and perhaps unsurprisingly law enforcement evinces biases that run along both gender and race lines No surprise springs from the fact that computer generated algorithms that propel predictive policing are often flagged as tools whereby racial discrimination abounds It should not therefore be pegged as flabbergasting that this sort of shady algorithmic governance is a byproduct of a grueling algorithmic dictatorship that is shaping up to crumble the foundations of Rule of Law upon which stands modern societies This is one of the key takeaways of this book Disturbingly enough brain computer interfaces are poised to be converted into shady tools to collate gauge thoughts emotions sentiments and crime related information that would be otherwise inaccessible to the governments rogue nations or unscrupulous actors prying eyes Much to our dismay an eerily dystopian world is unfolding before our very eyes This is the gist of transhumanism a byproduct of convolutional neural networks that revolve around deep learning genetic algorithms that will overhaul the current legal landscape beyond recognition This book charts the path ahead as to draw set in stone boundaries to prevent jurisdictions from careening into the chaos of genetic plutocracy that should be wished away

Perspectives and Theories of Social Innovation for Ageing Population Andrzej Klimczuk,Łukasz
