

The background of the book cover is a collage of warm, sepia-toned images. At the top, a rolled-up document with handwritten text is visible. Below the title, there is a horizontal band with a textured, parchment-like appearance. At the bottom, a globe is depicted, partially obscured by a grid of thin, light-colored lines, suggesting a global or research theme.

and Margaret D LeCompte 9780759122116      **Initiating Ethnographic Research** Stephen L. Schensul, Jean J. Schensul, Margaret D. LeCompte, 2012-12-13 This is Book 2 of 7 in the Ethnographer's Toolkit Second Edition. **Initiating Ethnographic Research: A Mixed Methods Approach** is the first book of its kind. Unlike texts that describe and detail methods for doing ethnographic and qualitative research once in the field, Book 2 explores in depth the many critical issues that ethnographic researchers need to consider before going to the field and in the earliest stages of the field experience. These include preparation of self-establishing relationships that ensure access to the field and steps in the construction of a formative theoretical model that will inform the entire research process from start to finish. Following guidelines established in Book 1, the first three chapters describe the reasons why ethnography should be considered a mixed methods approach to social science research. They discuss why theory is important in guiding a study and the important institutional and personal preparations required to enter a field setting and begin work. Additional chapters debunk the idea that ethnographers always enter the field with their minds a clean slate in terms of what they will find during their investigation. They show why and how researchers can develop initial theoretical models based on local knowledge and literature reviews. Ethnography uses a holistic approach so such models take into consideration both individual population and systemic or structural considerations. They lead the way to integrating ecological, empirical, critical, and interpretivist approaches into a comprehensive analysis of a dynamic system. Two chapters also provide detailed examples to illustrate the connection between steps in the modeling process: creation of observational measures and steps in data collection from most open-ended kinds of interviewing and observation to the kind of highly structured ethnographic surveying described in Book 3. Extensive illustrative case examples are included. The final chapter shows how the modeling process can be extended to guide the development of interventions and change strategies at multiple levels, a process that should be part of any research program. A wide variety of diagrams, instructions, examples, and illustrations make the topics and processes covered in Book 2 easy to read and understand even by novice researchers. Overall, Book 2 offers a unique mixed methods lens through which to build theory by engaging in research modeling to enter the field to set up to gather data and to anticipate influencing change.
