Ethical Questions And International Ngos Ethical Questions And International Ngos:

Ethical Questions and International NGOs Keith Horton,Chris Roche,2010-03-29 In recent decades there has been a great expansion in the number size and influence of International Non Governmental Organisations INGOs involved in international relief and development These changes have led to increased scrutiny of such organisations and this scrutiny together with increasing reflection by INGOs themselves and their staff on their own practice has helped to highlight a number of pressing ethical questions such organisations face such as should INGOs attempt to provide emergency assistance even when doing so risks helping to fuel further conflict How should INGOs manage any differences between their values and those of the people they seek to benefit How open and honest should INGOs be about their own uncertainties and failures This book consists of sustained reflections on such questions It derives from a workshop held at Melbourne University in July 2007 that brought together a group of people for the most part reflective practitioners and moral and political philosophers to discuss such questions It explores honestly some of the current challenges and dilemmas that INGOs face and also suggests some new ideas for meeting these challenges Our hope is that the kind of explicit reflection on the ethical issues INGOs face exemplified in this publication will help to promote a wider debate about these issues a debate that in turn will help INGO managers and others to make better wiser more ethically informed decisions

Ethical Questions and International Ngos Keith Horton,Chris Roche,2010-04-22 Should International Non Governmental Organizations INGOs attempt to provide emergency assistance even when doing so risks helping to fuel further conflict How should INGOs manage any differences between their values and those of the people they seek to benefit This book discusses these questions Critical Reflections on Development D. Kingsbury,2013-03-05 Designed as a critique of the key failures of international development this book brings together practitioners policy makers researchers activists and academics in an attempt to work toward a shared conceptualisation of development by outlining and critically reflecting on their own understanding of development

Public Value Adam Lindgreen,Nicole Koenig-Lewis,Martin Kitchener,John Brewer,Mark Moore,Timo Meynhardt,2019-05-08 Over the last 10 years the concept of value has emerged in both business and public life as part of an important process of measuring benchmarking and assuring the resources we invest and the outcomes we generate from our activities In the context of public life value is an important measure on the contribution to business and social good of activities for which strict financial measures are either inappropriate or fundamentally unsound A systematic interdisciplinary examination of public value is necessary to establish an essential definition and up to date picture of the field In reflecting on the public value project this book points to how the field has broadened well beyond its original focus on public sector management has deepened in terms of the development of the analytical concepts and frameworks that linked the concepts together and has been applied increasingly in concrete circumstances by academics consultants and practitioners This book covers three main topics deepening and enriching the theory of creating public value broadening the theory and practice of creating public

value to voluntary and commercial organisations and collaborative networks and the challenge and opportunity that the concept of public value poses to social science and universities Collectively it offers new ways of looking at public and social assets against a backdrop of increasing financial pressure new insights into changing social attitudes and perceptions of value and new models for increasingly complicated collaborative forms of service delivery involving public private and not for profit players

NGOs at the Table Mari Fitzduff,Cheyenne Church,2004-04-02 The number of NGO s working in the area of conflict has increased dramatically over the last few decades and they are fast becoming a vital component of both local and international responses to conflicts As their influence rises many seek to more effectively impact the policy making and program development of governments and intergovernmental organizations But how can NGOs do this effectively without sacrificing their own independence and flexibility NGOs at the Table explores such challenges by examining a number of NGOs diverse in size location and financial means that have successfully influenced both policy and program development in conflicts throughout the world It explores why these organizations decided to embark upon a strategic campaign to influence the policy making process as well as outlines the issues addressed and the tactics used It examines the constraints faced in trying to penetrate the governmental process and discusses how these obstacles were overcome The book also includes analysis and reflections by a variety of experienced policy makers and academics working in the field A unique and much needed resource for NGO s wishing to extend their own capacities in the field of policy

making this book will prove valuable for any policy maker wishing to take advantage of the unique capacities that NGOs contribute to the field of conflict prevention management and resolution
