

TRAUMA HEALING 2023

Advanced Equipping Session

WHO SHOULD ATTEND?

Participants must have attended an initial equipping session and also co-led or led at least two healing groups (or some equivalent activity) and submitted their reports.

ABOUT THE SESSION

This session, the second of two seminars, continues the equipping process for facilitators in Bible-based Trauma Healing using the book *Healing the Wounds of Trauma: How the Church Can Help* and its associated programme model. This proven approach uses applied Scripture and best mental health principles to address spiritual and emotional wounds caused by trauma of war, ethnic conflicts, natural disasters, car accidents, abuse, and similar events. The book has been translated and taught in over 100 countries with more than 184 language groups in Africa, Asia, the Pacific and the Americas.

The advanced session hones the skills acquired at the initial session and during the practicum. By the end of this session, trainees should be better able to solve programme issues arising in trauma healing as they carry out their ministries. They should understand the materials completely and clearly and be able to teach in a participatory way. Participants who have the necessary competencies are certified as training facilitators or healing group facilitators at the end of the advanced session.

LIMITED SEATS! (max 12 pax)

Registration closes 30 August 2023

NEW DATES IN SEPTEMBER

Advanced Trauma Healing:

Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care Charles B. Manda, 2019-12-12 Re authoring Life Narratives after Trauma is an interdisciplinary specialist resource for traumatic stress researchers practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma death illness and other existential crises This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have Pargament 2011 It will not only bring a spiritual perspective into the psychotherapeutic dialogue but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post traumatic settings The book makes several contributions to scholarship in the disciplines of although not limited to traumatic stress studies pastoral care and counselling psychology and psychiatry Firstly the book brings spirituality into the psychotherapeutic dialogue traditionally religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue Secondly it underscores the significance of documenting literary narratives as a means of healing trauma writing about our traumas enables us to express things that cannot be conveyed in words and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world Thirdly it proposes an extension to the five stage model of trauma and recovery coined by Judith Herman

Advanced Trauma Life Support Course for Physicians, 1989

Acute and Chronic Wounds - E-Book Ruth Bryant, Denise Nix, 2015-12-07 Prevent and manage wounds with this expert all inclusive resource Acute the comprehensive approach includes the latest advances in diagnosis differentiation of wound types nutrition prevention treatment and pharmacology Self assessment questions and answers in each chapter help you assess your knowledge and prepare for all wound certification exams Checklists offer a concise easy to read summary of the steps needed to achieve the best patient care outcomes Risk assessment scales help in determining a patient s risk for developing a wound and wound classification tools identify the proper terminology to be used in documentation Learning objectives at the beginning of each chapter focus your study on the most important content Principles for practice development boost outcomes and productivity in agencies and institutions home care acute care long term care and long term acute care settings NEW coverage includes the latest guidelines from WOCN AAWC NPUAP EPUAP and PPPIA and the American College of Physicians New sections cover the prevention and management of biofilm the new skin tear classification system MASD and MARCI CTP terminology and classification scheme and integration of the Health Belief Model NEW Additional full color photographs show the differential diagnosis of types of skin damage management of fistulas and NPWT procedures NEW Clinical Consult features help in applying concepts to clinical practice showing students and health care professionals how to assess manage and document real life patient and staff encounters using the ADPIE

framework NEW two color illustrations and design make the book more visually appealing *Diagnosis and Treatment of Traumatic Brain Injury* Rajkumar Rajendram, Victor R Preedy, Colin R. Martin, 2022-05-10 Diagnosis and Treatment of Traumatic Brain Injury will improve readers understanding of the complexities of diagnosis and management of traumatic brain injuries Featuring chapters on drug delivery different treatments and rehabilitation this volume discusses in detail the impact early diagnosis and effective management has on the long term prognosis of these injuries and the lives of those affected This book will be relevant for neuroscientists neurologists clinicians and anyone working to better understand these injuries Covers both the diagnosis and treatment of traumatic brain cord injury Contains chapter abstracts key facts dictionary and summary points to aid in understanding Features chapters on epidemiology and pain Includes MRI usage biomarkers and stem cell and gene therapy for management of spinal cord injury Discusses pain reduction drug delivery and rehabilitation **Advanced Trauma Life Support**, 1994 **New Diagnostic and Therapeutic Approaches for the Care of the Severely Injured Patient** Frank Hildebrand, Klemens Horst, 2020-12-15 Trauma represents a leading cause of death particularly in the younger population Traumatic brain injury and hemorrhage are the most common causes of early death whereas complications such as infections multi organ failure and persistent inflammation immunosuppression and catabolism syndrome PICS represent relevant factors for late adverse outcomes Pre and intra hospital diagnostic and therapeutic standard operating procedures have been shown to beneficially influence posttraumatic outcome However development of patient specific diagnostic and therapeutic strategies remains challenging due to uncertainties regarding the assessment of the individual risk profile Furthermore the relevance of prevention and rehabilitation measures to avoid unfavorable long term consequences of trauma is not fully elucidated With this Special Issue we wanted to reflect the current knowledge about the pathomechanisms associated with the impact of severe injury and its consequences for the further clinical course on the one hand and to point out new insights in regard to diagnostic and therapeutic approaches on the other hand Furthermore interesting aspects for future directions for the care of severely injured patients are illustrated
