It highlights how constant connectivity affects cognitive functions, sleep quality, and vision, leading to symptoms like digital eye strain and reduced mental clarity. The book dives into the neurological effects of prolonged screen exposure, such as the disruption of melatonin production by blue light, and offers practical digital detox strategies to counteract these effects. This health and fitness guide explores the importance of intentional digital breaks for maintaining optimal well-being, challenging the glorification of constant connectivity. It provides a comprehensive overview of research on screen time's effects since the advent of personal computers and smartphones. Each chapter guides the reader through understanding digital overload, exploring the impact of screen time, and implementing effective digital detox techniques for a balanced digital lifestyle. Ultimately, it empowers readers to adopt mindful technology use and sustain healthier digital habits. *Business Studies for Me the People* Jamey M. Long, Joseph A. Pisani, 2025-07-28 Welcome to the new world of industry where business is for me, business is for the people, business is for me, and the people are for business. You may ask yourself, are these things not the same? The answer is No. Should they be the same? The answer is Yes. So the real question becomes, Why not? In this book, the authors explain the cause for the difference between the me and the people in the field of business. This book can be used to measure the distance between the me and the people in navigating the field of business and its distance as it relates to the current industrial environment. Do not just describe it. Take action. Actually embrace it and do it. This is what this book is about.

Emerging Trends in Technology for Education in an Uncertain World Dwi Nanto, Maila Rahiem, Tita Maryati, 2021-12-24 Presently, people are facing a condition called VUCA (Volatility, Uncertainty, Complexity, and Ambiguity), where this condition is described as a turbulent, uncertain, complicated, unclear condition. The world of work and industry is changing quickly, driven by the development of technology, information, and communication. Advances in computer technology, artificial intelligence, and robotics, which is also called the industrial revolution 4.0 era, are of significant influence on the environment and people. A time where humans must learn quickly and an era where the future is unpredictable, where choices for various conditions are increasing and mindsets are changing. The big challenge for educational institutions, especially Islamic educational institutions today, is how to prepare young people on various aspects of cognitive, mental, and spiritual preparedness to face the changing environment. Development in the real world is far more complex than what is learned in the classroom, so it is necessary to educate and transform curriculum that is directed in accordance with the demands of present times. Global Trends in Communication Education and Research Kenneth W. Y. Leung,James Francis Kenny,Paul S. N. Lee,2006

Knowledge & Power in the Global Economy David Gabbard,2008 The second edition of Knowledge and Power in the Global Economy examines how neoliberal and neoconservative policies are working in tandem to privatize and commercialize public schools It looks at how these policies and the agendas behind them have impacted the internal dynamics of school management teaching and learning as well as how they have transformed the external dynamics of education from a public good or service offered to serve public interests to a private enterprise primarily serving private interests In addition to information critique and analysis multiple perspectives are provided that readers can draw upon to formulate an alternative vision of education as a crucial element of social change along democratic and egalitarian lines The first edition of this volume provided a critical encyclopedic approach to the rhetoric of educational reform as it developed from the 1980s through the 1990s critiquing its vocabulary elaborating the multiplicity of ways that the logic of neoliberalism and the emerging patterns of high stakes testing and accountability were impacting the curriculum and introducing ideas associated with alternative and liberatory educational projects Since its publication in 2000 policy developments such as the No Child Left Behind Act of 2001 in the U S and others in the U K and other parts of the world have nationalized and intensified these patterns deepening the logic and extent of neoliberalism s hold over educational reforms At the same time it is impossible to understand the current crises in education solely in terms of neoliberalism the impact of neoconservatism must also be considered Hence this second edition has a new subtitle The Effects of School Reform in a Neoliberal Neoconservative Age This edition is structured around five themes Political and Social Foundations Anti Educational Foundations The Set Up Anti Educational Foundations The Trap Classroom Consequences and Democracy s Path This volume will particularly interest scholars and professionals across the fields of educational foundations curriculum theory and educational policy and is well suited as a text for courses in these areas
