**Advances in Scalable and Intelligent Geospatial Analytics** Surya S Durbha, Jibonananda Sanyal, Lexie Yang, Sangita S Chaudhari, Ujwala Bhangale, Ujwala Bharambe, Kuldeep Kurte, 2023-05-12 Geospatial data acquisition and analysis techniques have experienced tremendous growth in the last few years providing an opportunity to solve previously unsolved environmental and natural resource related problems. However, a variety of challenges are encountered in processing the highly voluminous geospatial data in a scalable and efficient manner. Technological advancements in high performance computing, computer vision, and big data analytics are enabling the processing of big geospatial data in an efficient and timely manner. Many geospatial communities have already adopted these techniques in multidisciplinary geospatial applications around the world. This book is a single source that offers a comprehensive overview of the state of the art and future developments in this domain.

**FEATURES** Demonstrates the recent advances in geospatial analytics tools, technologies, and algorithms. Provides insight and direction to the geospatial community regarding the future trends in scalable and intelligent geospatial analytics. Exhibits recent geospatial applications and demonstrates innovative ways to use big geospatial data to address various domain specific real world problems. Recognizes the analytical and computational challenges posed and opportunities provided by the increased volume, velocity, and veracity of geospatial data. This book is beneficial to graduate and postgraduate students, academicians, research scholars, working professionals, industry experts, and government research agencies working in the geospatial domain where GIS and remote sensing are used for a variety of purposes. Readers will gain insights into the emerging trends on scalable geospatial data analytics.

**Informatics for Health: Connected Citizen-Led Wellness and Population Health** Ronald Cornet, Colin McCowan, Niels Peek, Philip Scott, 2017-05-15 Over recent years there has been major investment in research infrastructure to harness the potential of routinely collected health data. In 2013 The Farr Institute for Health Informatics Research was established in the UK undertaking health informatics research to enhance patient and public health by the analysis of data from multiple sources and unleashing the value of vast sources of clinical, biological, population, and environmental data for public benefit. The Medical Informatics Europe MIE conference is already established as a key event in the calendar of the European Federation of Medical Informatics EFMI. The Farr Institute has been establishing a conference series. For 2017 the decision was made to combine the power and established reputational excellence of EFMI with the emerging and innovative research of The Farr Institute community to create Informatics for Health 2017, a joint conference that creates a scientific forum allowing these two communities to share knowledge, insights, and experience, advance cross disciplinary thinking, and stimulate creativity. This book presents the 116 full papers presented at that conference held in Manchester UK in April 2017. The papers are grouped under five headings: connected and digital health, health data science, human organisational and social aspects, knowledge management, and

quality safety and patient outcomes and the book will be of interest to all those whose work involves the analysis and use of data to support more effective delivery of healthcare     The Science Teacher ,2009     **Focus on Earth Science** ,2001
