- What are you asked to explain about the blocks?

During: Ask guided questions as needed.

- How could you use multiplication to describe the relationship between the blocks?
- What is the same about the ones cube and the tens rod?
- What is the same about the tens rod and the hundreds flat?

After: Share and discuss solutions. Have students share how they used different strategies to solve the problem. Show two examples of student work and have them explain their thinking. Analyze student work samples as a class.
