Eowpvt And Rowpvt Bilingual Manual:

Research Methods for Understanding Child Second Language Development Yuko Goto Butler, Becky H.

Huang, 2022-09-15 Butler and Huang's book is one of the first to focus on second language L2 development research methods and techniques specifically targeted at children of primary and pre primary years. The last decade has seen a growing number of L2 studies of children aged 4-12, a demographic with special developmental characteristics that confound research methods designed for studying adults. Written by experts from a variety of disciplines, this book covers major research methods and techniques in existing L2 development research including observations, surveys, interviews, introspective methods, speech production methods, receptive methods, eye tracking and brain imaging as well as research methods specifically designed for L2 children with special educational needs. The book also discusses various age-related considerations and challenges if they are employed to young L2 learners. This will be essential reading for SLA, child development and TESOL researchers and students in these courses will benefit particularly from pedagogical material such as further readings and discussion questions.

Clinical Management of Children With Cochlear Implants, Second Edition Laurie S. Eisenberg, 2016-07-27. A comprehensive volume written by leading researchers, clinicians and educators in the field. *Clinical Management of Children With Cochlear Implants, Second Edition* offers a guide for practitioners, instructors and students. The book builds on over thirty-five years of collective experience in pediatric cochlear implantation and addresses contemporary practices. The authors share their expertise in such disciplines as otolaryngology, pediatrics, audiology, speech language pathology, habilitation, education, electrophysiology, psychology and clinical research. Although many of the chapters from the first edition remain relevant today, the field continues to evolve with advancements in technology, expanding indications and patient demographics. The second edition reflects these changes with new topics and expanded updates presenting up-to-date research findings with implications for clinical management of the pediatric implant population. New to this edition: New chapters on neurocognitive assessment, dual language learning, early literacy, family-centered habilitation and development of evidence-based programs. Expanded chapters on device programming, education and auditory brainstem implants. Updates in research and clinical practices in assessment and management.

A Compendium of Neuropsychological Tests Esther Strauss, Elisabeth M. S. Sherman, Otfried Spreen, 2006. This compendium gives an overview of the essential aspects of neuropsychological assessment practice. It is also a source of critical reviews of major neuropsychological assessment tools for the use of the practicing clinician.
