

SIMPLIFYING PREVENTIVE VISIT CODING: BEST PRACTICES FOR CPT 99396

2. Application of the Modifier

Modifier 25: If a patient presents with a new or chronic issue that requires more evaluation than preventive care, a separate E/M code can be billed along with modifier 25.

Modifier 33: If services are fully covered under the Affordable Care Act (ACA) preventive care guidelines, modifier 33 can be applied.

3. Separate Billing for Non-Preventive Services

If the patient has a preventive visit but also requires management of an acute or chronic problem, the physician should bill another E/M code (e.g., 99213, 99214) with modifier 25. The documentation must clearly indicate that the two services were done separately.

4. Payer-Specific Guidelines

Policies on preventive visits vary from insurance payer to insurance payer. Providers should refer to individual payer requirements for coverage, documentation, and bundling rules.

Trisolini, Gregory C. Pope, Janet B. Mitchell, Leslie M. Greenwald, 2011-02-28 This book provides a balanced assessment of pay for performance P4P addressing both its promise and its shortcomings P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators despite limited evidence of their effectiveness On a positive note this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care The current interest in P4P echoes earlier enthusiasms in health policy such as those for capitation and managed care in the 1990s that failed to live up to their early promise The fate of P4P is not yet certain but we can learn a number of lessons from experiences with P4P to date and ways to improve the designs of P4P programs are becoming apparent We anticipate that a second generation of P4P programs can now be developed that

can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs
