Mathematics Competitions Jane Chen, Yongcheng Chen, Sam Chen, Guiling Chen, 2012-07-02 While the books in this series are primarily designed for AMC competitors they contain the most essential and indispensable concepts used throughout middle and high school mathematics Some featured topics include key concepts such as equations polynomials exponential and logarithmic functions in Algebra various synthetic and analytic methods used in Geometry and important facts in Number Theory The topics are grouped in lessons focusing on fundamental concepts Each lesson starts with a few solved examples followed by a problem set meant to illustrate the content presented At the end the solutions to the problems are discussed with many containing multiple methods of approach I recommend these books to not only contest participants but also to young aspiring mathletes in middle school who wish to consolidate their mathematical knowledge I have personally used a few of the books in this collection to prepare some of my students for the AMC contests or to form a foundation for others By Dr Titu Andreescu US IMO Team Leader 1995 2002 Director MAA American Mathematics Competitions 1998 2003 Director Mathematical Olympiad Summer Program 1995 2002 Coach of the US IMO Team 1993 2006 Member of the IMO Advisory Board 2002 2006 Chair of the USAMO Committee 1996 2004 I love this book I love the style the selection of topics and the choice of problems to illustrate the ideas discussed The topics are typical contest problem topics divisors absolute value radical expressions Veita's Theorem squares divisibility lots of geometry and some trigonometry And the problems are delicious Although the book is intended for high school students aiming to do well in national and state math contests like the American Mathematics Competitions the problems are accessible to very strong middle school students The book is well suited for the teacher coach interested in sets of problems on a given topic Each section begins with several substantial

solved examples followed by a varied list of problems ranging from easily accessible to very challenging Solutions are provided for all the problems In many cases several solutions are provided By Professor Harold Reiter Chair of MATHCOUNTS Question Writing Committee Chair of SAT II Mathematics committee of the Educational Testing Service Chair of the AMC 12 Committee and AMC 10 1993 to 2000 *Awesome Math* Titu Andreescu, Kathy Cordeiro, Alina Andreescu, 2019-11-13 Help your students to think critically and creatively through team based problem solving instead of focusing on testing and outcomes Professionals throughout the education system are recognizing that standardized testing is holding students back Schools tend to view children as outcomes rather than as individuals who require guidance on thinking critically and creatively *Awesome Math* focuses on team based problem solving to teach discrete mathematics a subject essential for success in the STEM careers of the future Built on the increasingly popular growth mindset this timely book emphasizes a problem solving approach for developing the skills necessary to think critically creatively and collaboratively In its current form math education is a series of exercises straightforward problems with easily obtained answers Problem solving however involves multiple creative approaches to solving meaningful and interesting problems The authors co founders of the multi layered educational organization *AwesomeMath* have developed an innovative approach to teaching mathematics that will enable educators to Move their students beyond the calculus trap to study the areas of mathematics most of them will need in the modern world Show students how problem solving will help them achieve their educational and career goals and form lifelong communities of support and collaboration Encourage and reinforce curiosity critical thinking and creativity in their students Get students into the growth mindset coach math teams and make math fun again Create lesson plans built on problem based learning and identify and develop educational resources in their schools *Awesome Math Teaching Mathematics with Problem Based Learning* is a must have resource for general education teachers and math specialists in grades 6 to 12 and resource specialists special education teachers elementary educators and other primary education professionals **Mathcounts State Competition Preparation** Yongcheng Chen, Sam Chen, 2015-04-09 This book can be used by 5th to 8th grade students preparing for Mathcounts State and National Competitions Each chapter consists of 1 basic skill and knowledge section with plenty of examples 2 exercise problems and 3 detailed solutions to all problems Who's who in Engineering ,1995
