## **Economics Grade 12 Paper 2 2014 June:**

*After Piketty* Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.

**A Comparative History of Commerce and Industry, Volume II** David E. McNabb, 2016-01-26 *A Comparative History of Commerce and Industry Volume II* offers a subjective review of how the cultural, social, and economic institutions of commerce and industry evolved in industrialized nations to produce the institution we now know as business enterprise.

**Rankings and the Reshaping of Higher Education** Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers, and scholars.

**Playing with Fire** Yilmaz Akyüz, 2017-06-30 Starting in the early 1990s, many emerging and developing economies (EDEs) liberalized their capital accounts, allowing greater freedom for international lenders and investors to enter their markets, as well as for their residents to borrow and invest in international financial markets. Despite recurrent crises, liberalization has continued and, in fact, accelerated in the new millennium. Integration has been greatly facilitated by progressively looser monetary policy in the United States, notably the policies that culminated in debt crises in the United States and Europe, and the ultra-easy monetary policy adopted in response. Not only have their traditional cross-border linkages been deepened and external balance sheets expanded rapidly, but also foreign presence in their domestic financial markets and the presence of their nationals in foreign markets have reached unprecedented levels. As a result, new channels have emerged for the transmission of financial shocks from global boom-bust cycles. Almost all EDEs are now vulnerable, irrespective of their balance of payments, external debt, net foreign assets, and international reserve positions, although these play an important role in the way such shocks could impinge on them. This is a matter for concern since the multilateral system still lacks mechanisms for orderly resolution of financial crises with international dimensions. *Playing with Fire* provides an empirical account of deeper integration of EDEs into the global financial system and discusses its implications for stability and growth, focusing on the role of policies in the new millennium in both EDEs and the United States and Europe. *The Annalist*, 1919

**The Political Economy of Megaprojects in Asia** Hyun Bang Shin, Dong-Wan Gimm, 2025-02-18 This book offers a comprehensive analysis of how the developmental goals of Asian states are reflected in large-scale projects and how various actors both realize and challenge these goals. The rise of Asian economies has spurred the proliferation of megaprojects through large-scale resource mobilization, necessitating varying degrees of state intervention. Despite neoliberal pressures, these projects remain linked to national developmental aspirations driven by domestic, transnational, or combined pro-growth

interests and serve multiple political purposes The book advances the argument that megaprojects embody the dynamics of multiscalar strategic relations that determine the process and outcome of urbanization These projects create iconic landmarks new towns central business districts and infrastructure showcasing intertwined political and economic interests By examining contemporary megaprojects in China South Korea Taiwan India Malaysia and Turkey the contributing authors reveal the complexity of urbanizing forces and their multiscalar nature in shaping the built environment and shed light on the intricate interplay of state strategies economic needs and sociopolitical forces that influence urban landscapes This interdisciplinary work provides a nuanced understanding of the political economy underpinning Asian urbanization and contributes to ongoing debates on urban development state society relations and the production of space in the context of globalization Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
