Ecosystem Based Adaptation 12 Community Environment And Disaster Risk Management:

Ecosystem-Based Disaster and Climate Resilience Mahua Mukherjee, Rajib Shaw, 2021-08-04 This book provides an introduction to the critical role of ecosystem based disaster risk resilience Eco DRR for building community resilience to multiple environmental risks such as rising heat water stress and pollution Blue green infrastructure BGI is an Eco DRR tool that is an under explored paradigm and can respond as one common strategy to targets set by the Sustainable Development Goals UNDP Climate Agreements UNEP the Sendai Framework UNISDR and the New Urban Agenda UNCHS Highlighted here in a systematic way is the importance of blue green infrastructures in resilience building The purpose is to introduce readers to the challenging context of development and opportunity creation for Eco DRR The roles of policy scientific research and implementation are presented cohesively An attractive proposition of the book is a collection of case studies from different parts of the world where integration of BGI is experimented with at various levels of success It envisages that shared tacit experiences from the realm of practice will further strengthen explicit knowledge The focus in this book is on need and context building policy and science investigation analysis and design case studies and a road map for the future in four successive parts Each part is self sufficient yet linked to its predecessor successor or both as the case may be

Resistance, Resilience, and Recovery from Disasters Ma. Regina M. Hechanova, Lynn C. Waelde, 2020-08-25 This book showcases research in disaster response in Southeast Asia of particular interest for those studying disaster and mental health and for providers of mental health and psychosocial support Contributors cover topics ranging from resistance to disasters to resilience and recovery interventions *The Role of Ecosystems in Disaster Risk Reduction* Fabrice G. Renaud, Karen Sudmeier-Rieux, Marisol Estrella, 2013 The uptake of ecosystem based approaches for disaster risk reduction DRR is slow however despite some success stories There are multiple reasons for this reluctance ecosystem management is rarely considered as part of the portfolio of DRR solutions because the environmental and disaster management communities typically work independently from each other its contribution to DRR is highly undervalued compared to engineered solutions and therefore not given appropriate budget allocations and there are poor interactions between policymakers and researchers leading to unclear and sometimes contradictory scientific information on the role of ecosystems for DRR The aim of this book is to provide an overview of knowledge and practice in this multidisciplinary field of ecosystems management and DRR The contributors professionals from the science and disaster management communities around the world represent state of the art knowledge practices and perspectives on the topic *Social-Ecological Systems (SES)* Mohamed Behnassi, Himangana Gupta, Mahjoub El Haiba, Gopichandran Ramachandran, 2021-07-12 This book contributes to the multidisciplinary debate about social ecological systems SES within the perspective of rethinking the nature of interaction between these systems especially in the Anthropocene Era Most chapters either deliberate on risk dynamics threatening current SES or stimulate thought processes to manage such risks and related negative implications After analyzing the main

drivers of SES vulnerability the book highlights the shifts to be made to enhance the sustainability and resilience of these systems mainly the integration and restructuring of governance frameworks the reorganization of production and consumption systems far from conventional models based on consumerism the elaboration of mitigation adaptation and SDGs implementation measures from a co benefit perspective and the consideration of appropriate approaches and paradigms while elaborating and implementing response mechanisms This volume is relevant to researchers experts students practitioners and decision makers from different scales and spheres

Multi-Hazard Early Warning and Disaster Risks Dilanthi Amaratunga, Richard Haigh, Nuwan Dias, 2021-09-11 This book presents a collection of papers under the theme of multi hazard early warning and disaster risks These were selected from the presentations made at the International Symposium on Tsunami and Multi Hazard Risks Early Warning and Community Awareness in supporting implementation of the Sendai Framework for Disaster Risk Reduction 2015 2030 This conference aimed to recognize achievements and to highlight work that still needs to be carried out The conference promoted collaboration among academia research institutions and disaster management offices and further encouraged multidisciplinary and multi sectoral interaction This International Symposium on Multi Hazard Early Warning and Disaster Risk Reduction provided an important opportunity to reflect upon our progress to date in tackling disaster risk but also to consider some of the challenges and opportunities that lay ahead of us A particular focus of this event was Multi Hazard Early Warning During the negotiations for the Sendai Framework countries and partners highlighted the need to

- 1 Continue to invest in develop maintain and strengthen people centred end to end early warning systems
- 2 Promote the application of simple and low cost early warning equipment and facilities
- 3 Broaden the dissemination channels for early warning information to facilitate early action

Countries also called for the further development of and investment in effective nationally compatible regional multi hazard early warning mechanisms To address these needs global Target g of the Sendai Framework was adopted namely to substantially increase the availability of and access to multi hazard early warning systems and disaster risk information and assessments to the people by 2030 As illustrated by recent events in Indonesia it is also vital to address the challenge of cascading hazards that pose a tsunami risk and the importance of linking tsunami early warning to a multi hazard environment However moving towards a multi hazard environment is complex and poses many challenges but can bring significant benefits in terms of efficiencies and also in recognising the links between hazards such as cascading threats We very much hope that this book will provide an important platform to address these and other challenges in addressing disaster risk as well as supporting implementation of the Sendai Framework for Disaster Risk Reduction

Climate Change and Food Security Elizabeth Thomas Hope, 2016-12-08 Global climatic change has resulted in new and unpredictable patterns of precipitation and temperature the increased frequency of extreme weather events and rising sea levels These changes impact all four aspects of food security availability accessibility stability of supply and appropriate nourishment as well as the entire food system

food production marketing processing distribution and prices Climate Change and Food Security focuses on the challenge to food security posed by a changing climate The book brings together many of the critical global concerns of climate change and food security through local cases based on empirical studies undertaken in Sub Saharan Africa and the Caribbean Focusing on risk reduction and the complex nature of vulnerability to climate change the book includes chapters on the responsiveness of farmers based on traditional knowledge as well as the critical phenomenon of food insecurity in the urban setting Other chapters are devoted to efforts made to strengthen resilience through long term development with interventions at the regional and national levels of scale It also examines cross cutting themes that underlie the strategies employed to achieve food security including equity gender livelihoods and governance This edited volume will be of great interest to students and scholars of climate change food security environmental management and sustainable development

Climate Change and Community Resilience A.K. Enamul Haque,Pranab Mukhopadhyay,Mani Nepal,Md Rumi Shammin,2021-10-21 This open access book documents myriads of ways community based climate change adaptation and resilience programs are being implemented in South Asian countries The narrative style of writing in this volume makes it accessible to a diverse audience from academics and researchers to practitioners in various governmental non governmental and international agencies At a time when climate change presents humanity with a gloomy future the stories of innovation creativity grassroots engagement and locally applicable solutions highlighted in this book provides insights into hopeful ways of approaching climate solutions South Asian countries have been dealing with the impact of climate change for decades and thus offer valuable learning opportunities for developing countries within and beyond the region as well as many western countries that are confronting the wrath of climate induced natural disasters more recently SANDEE has been a pioneer in the development of research and training in environmental economics and related issues in South Asia and Prof Maler has been throughout SANDEE s history its mentor and its strongest supporter Many young economists in South Asia have significantly benefited from Prof Maler s guidance and inputs The present volume on Climate Change and Community Resilience Insights from South Asia is a fitting tribute and an excellent reflection of Prof Maler s contributions to the SANDEE programme throughout his association Mahesh Banskota Ph D Professor Development Studies School of Arts Kathmandu University This comprehensive volume aptly identifies grassroots initiatives as the core of the problem of adaptation to climate change The analysis of the different experiments is lucid inclusive and full of interesting detail The methodologies used and the subjects covered span a range of frameworks and narratives Put together the studies are a fitting tribute to Karl Goran Maler who spent years putting his impeccable expertise to use for the cause of enhancing research in South Asia Kanchan Chopra Ph D Former Director and Professor Institute of Economic Growth Delhi and Fellow SANDEE The slow international policy response to climate change elevates the importance of understanding how communities can respond to climate change s many threats This unusually accessible volume provides that understanding for

South Asia while being relevant to the rest of the world Its emphasis on research by scholars from the region makes it a wonderful tribute to Prof Karl G ran M ler who contributed so much to the growth of environmental economics research capacity in South Asia Jeffrey R Vincent Ph D Clarence F Korstian Professor of Forest Economics Management Nicholas School of the Environment Duke University USA

Indigenous Knowledge and Climate Governance Eromose E. Ebhuoma,Llewellyn Leonard,2022-06-04 This book investigates indigenous knowledge systems IKS in sub Saharan Africa thereby highlighting its role in facilitating adaptation to climate variability and change and also demystifying the challenges that prevent it from being integrated with scientific knowledge in climate governance schemes Indigenous people and their priceless knowledge rarely feature when decision makers prepare for future climate change This book showcases how Indigenous knowledge facilitates adaptation to climate change including how collaborations with scientific knowledge have cascaded into building people s resilience to climatic risks This book also pays delicate attention to the factors fueling epistemic injustice towards Indigenous knowledge which hampers it from featuring in climate governance schemes across sub Saharan Africa The key insights shared in this book illuminate the issues that contribute meaningfully towards the actualisation of the UN SDG 13 and promote mechanisms for raising capacity for effective climate change related planning and management in sub Saharan Africa
