*Educating Ruby* Guy Claxton, Bill Lucas, 2015-04-07 With forewords by Professor Tanya Byron and Octavius Black

*Educating Ruby* What Our Children Really Need To Learn is a powerful call to action by acclaimed thought leaders Guy Claxton and Bill Lucas. It is for everyone who cares about education in an uncertain world and explains how teachers, parents and grandparents can cultivate confidence, curiosity, collaboration, communication, creativity, commitment and craftsmanship in children at the same time as helping them to do well in public examinations. *Educating Ruby* shows unequivocally that schools can get the right results in the right way so that the Rubys of tomorrow will emerge from their time at school able to talk with honest pleasure and reflective optimism about their schooling. Featuring the views of schoolchildren, parents, educators and employers and drawing on Guy Claxton and Bill Lucas' years of experience in education including their work with Building Learning Power and the Expansive Education Network, this powerful new book is sure to provoke thinking and debate. Just as Willy Russell's *Educating Rita* helped us rethink university, the authors of *Educating Ruby* invite fresh scrutiny of our schools.

Teaching Creative Thinking Bill Lucas, Ellen Spencer, 2017-09-26

In *Teaching Creative Thinking: Developing Learners Who Generate Ideas and Can Think Critically*, Bill Lucas and Ellen Spencer define and demystify the essence of creative thinking and offer action-oriented and research-informed suggestions as to how it can best be developed in learners. Where once it was enough to know and do things, young people now need more than subject knowledge in order to thrive: they need capabilities. *Teaching Creative Thinking* is the first title in the three-part *Pedagogy for a Changing World* series, founded upon Lucas and Spencer's philosophy of dispositional teaching, a pedagogical approach which aims to cultivate in learners certain dispositions that evidence suggests are going to be valuable to them both at school and in later life. A key capability is creative thinking, and in 2021 one of the guardians of global comparative standards, PISA, is recognising its importance by making creative thinking the innovative assessment domain to supplement their testing of 15-year-olds' core capabilities in English, maths and science. Creative thinkers are inquisitive, collaborative, imaginative, persistent and disciplined, and schools which foster these habits of mind in learners need to be creative in engaging children and young people by embedding creativity into their everyday educational experiences. In this extensive enquiry into the nature and nurture of creative thinking, the authors explore the effectiveness of various pedagogical approaches, including problem-based learning, growth mindset, playful experimentation and the classroom as a learning community, and provide a wealth of tried and tested classroom strategies that will boost learners' critical and creative thinking skills. The book is structured in an easy-to-access format, combining a comprehensive listing of practical ideas to stimulate lesson planning with expert guidance on integrating them into your practice, followed by plenty of inventive suggestions as to how learners' progress can be assessed and tracked along the way by both the pupil and the teacher. The authors then go further to offer exemplars of success by presenting case studies of schools' innovations in adopting these approaches and dedicate a chapter to dispelling any

pressing doubts that teachers may have by exposing the potential pitfalls and offering advice on how to avoid them Venturing beyond the classroom setting Teaching Creative Thinkingalso delves into the ways in which a school can work towards the provision of co curricular experiences such as partnering with a range of external community groups and better engage its leadership team and pupils parents with the idea of creative thinking in order to support learners with opportunities to grow The authors offer many examples which will inspire schools to do just this and collate these ideas into building a framework for learning that equips young people in schools today with the twenty first century skills and capabilities that will enable them to thrive in the workforce of tomorrow Replete with research led insight and ready to use strategies Teaching Creative Thinkingis a powerful call to action and a practical handbook for all teachers and leaders in both primary and secondary settings who want to embed a capabilities approach in their schools Developing Tenacity Bill Lucas, Ellen Spencer, 2018-04-20 The UK s All Party Parliamentary Group on Social Mobility recently proposed the adoption by schools of specific interventions in the areas of resilience and character meanwhile across the Atlantic an end of high school score for grit is also being considered in the USA In line with this growing consensus an increasing body of evidence suggests that cultivating these competencies is key to success both in school and in later life In Developing Tenacity the second instalment in the Pedagogy for a Changing World series Lucas and Spencer show educators how Delving beyond grit and growth mindset and encompassing more than the formal curriculum Developing Tenacity draws on the co authors research at the University of Winchester s Centre for Real World Learning to offer a powerful synthesis of what it takes for learners to persevere when confronted with challenges The resulting analysis depicts the true value of tenacity inside and outside the educational setting and provides teachers with action oriented strategies as to how the four key habits of tenacity confidence control commitment and connectivity can be developed in learners The wealth of teaching and learning methods presented is accompanied by practical suggestions on how to embed tenacity more systematically into the curriculum providing plenty of stimuli for lesson planning and for the drip feeding of everyday activities which boost learners agency and self efficacy The authors also investigate the effectiveness of various pedagogical approaches including developmental self evaluation deliberate practice and service learning and share inventive assessment methods which teachers can employ to track learners progress along the way Lucas and Spencer then go further by showcasing case studies that illustrate the successful adoption of a capabilities approach by various educational institutions and offer expert advice on how teachers can overcome any potential obstacles as they journey towards cultivating a tenacious learning culture in their classrooms Suitable for all teachers and school leaders in both primary and secondary settings who want to instil a strong sense of tenacity in their pupils approach to learning Click here to watch Prof Bill Lucas and Prof Guy Claxton s video Putting the heart and the hand back into schools Developing Tenacity has been named a finalist in the 2018 INDIES Book of the Year Awards in the education category Educating Ruby ,2015 **Powering Up Children** Guy Claxton, Becky Carlzon, 2018-12-20 In
