Myths of the Tribe David Rich, 2021-12-26 Myths of the Tribe illustrates the negative historical impact of our major religions which have created unending conflicts that obscure clear thinking and continue hazardous to our health today More

than two centuries after the Age of Reason culminated in the French Revolution modern society still operates on the basis of assumptions and attitudes that originated in the ancient myths propagated by organized religion These myths hamper efforts to apply reason to our problems and foster violent conflicts that threaten global security Myths of the Tribe illustrates how the belief systems of all major religions have become a detriment to clear thinking rational conduct and wise public policy suggesting we substitute a rational analysis of all problems in the light of objective scientific evidence a system of ethics that allows complete individual liberty constrained only by the principle of harming no one else taking personal responsibility for one's own welfare and actions and the absence of government control over the pursuit of happiness As relevant today as it was when first published by Prometheus Books in 1993 Myths of the Tribe has been updated in its second edition with new data reflecting our views on religion and social mores in the twenty first century

Heretics and Scholars in the High Middle Ages, 1000-1200 Heinrich Fichtenau, 2010-11-01 The struggle over fundamental issues erupted with great fury in the eleventh and twelfth centuries In this book preeminent medievalist Heinrich Fichtenau turns his attention to a new attitude that emerged in Western Europe around the year 1000 This new attitude was exhibited both in the rise of heresy in the general population and in the self confident rationality of the nascent schools With his characteristic learning and insight Fichtenau shows how these two separate intellectual phenomena contributed to a medieval world that was never quite as uniform as might appear from our modern perspective

Lessons of the Locker Room Andrew W. Miracle, C. Roger Rees, 1994 The authors believe

individual educational goals should be complemented by athletic experiences and desirable social ethics should be expressed through sports participation instead of the win at all costs mentality that pervades most of today's locker rooms. They make predictions about what sport will look like in the future if we can get beyond the myth that it builds character. *The Writing Requirements for Graduate Degrees* Paul Eric Koefod, 1964 **The Educational Times, and Journal of the College of Preceptors**, 1911 **Educational Times and Journal of the College of Preceptors**, 1911 **Guide to the System of Cataloguing of the Reference Library** Public Library of New South Wales, Henry Charles Lennox Anderson, 1902 **The Japan Daily Mail**, 1888 Harvard Educational Review Howard Eugene Wilson, 1956.
