Reflective Teaching and Learning in the Secondary School Sue Dymoke, 2012-11-13 Informed teaching is built upon a clear understanding of a wide range of professional issues. Reflective Teaching and Learning in the Secondary School offers a comprehensive overview of core teaching topics for professional studies modules on secondary initial teacher education courses. Offering a critically engaged examination of practical and theoretical topics in order to encourage deeper reflection on what underpins good teaching practice, this second edition has been carefully updated to provide a contemporary introduction to secondary education. New to this edition is a new chapter on diversity, social justice, and global issues in teaching, a new chapter on pastoral and tutorial roles, masters level critical reading tasks in every chapter, awareness of recent developments in education policy. This is indispensable reading for anyone training to teach in secondary education, including postgraduate PGCE, SCITT, and school-based routes into teaching. Sue Dymoke is Senior Lecturer in Education at the University of Leicester. **Secondary School External Examination Systems** Barend Vlaardingerbroek, Neil Taylor, 2009 Summative assessment has been a contentious issue in educational circles for several decades, particularly high stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives as their outcomes are principal determinants of young people's future prospects. These examinations are external; they are devised, conducted, and processed by agencies outside the schools, usually ministerial examination units. As such, they act as blind arbiters of student achievement, providing the proverbial level playing field which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear,

examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education Exit points occurred from primary school level up from where unsuccessful candidates could enter the labour force and or embark on occupationally specific further education and training With the modernisation of the labour market and an ever higher social demand for access to higher levels of formal education the filtering function of examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems including the modification and in some instances abandonment of external examinations This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P Heyneman of World Bank repute there are sixteen chapters presenting Country Case Studies which have been written up under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics

The ICT Teacher's Handbook Roger Crawford, 2013-06-26 The ICT Teacher's Handbook is an indispensable guide for all teachers responsible for the teaching and management of ICT in the secondary school both as a comprehensive introduction for students learning to teach ICT and as a source of ongoing support for busy practising teachers Illustrated throughout with case studies key further reading and guidance on where to find and how to choose the best software and resources the book also features a guide to specifications software for whole school support and a useful glossary of key terms Key topics covered include Organising and delivering the ICT National Curriculum at key stages 3 and 4 and post 16 Teaching and learning with VLEs IWBs social networking and mobile technologies Assessment record keeping and reporting Popular hardware software and networks External assessment target setting and tracking Managing technical support and technicians Preparing for promotion and managing an ICT department Strategies for whole school management of ICT Written for trainee and experienced ICT teachers and managers in both English and international schools The ICT Teacher's Handbook is an authoritative guide designed to support effective teaching and learning and efficient use of technology in all schools
