Dentith, Wendy Griswold, 2017-03-31 As ecological issues increase and concern worldwide is mounting about the changing nature of work and cultural life the field of adult education must respond Adult education holds much potential for its ability to highlight cultural knowledge promote change and maximize the capacity of adults to work together in strengthening mutually supportive communities that contribute to a sustainable future It is imperative that we re educate adults about productive but sustainable work and stronger local community living within an understanding of the relational being and the interdependency of all things This edited collection explores the cultural roots of the ecological cultural crisis and its relationship to adult education The development of sound practices and new cultural understandings among adults are emphasized Certainly there exists evidence of small grassroots work that builds hope and skills for the coming of a new age of sustainable and just life This volume discusses the Connections between sustainability environmental and ecojustice education Forms of radical sustainability adult education Established cultural institutions as potential agents of change Principles of ecojustice education and Implementation of these principles in formal and community education settings This is the 153rd volume of the Jossey Bass series New Directions for Adult and Continuing Education Noted for its depth of coverage it explores issues of common interest to instructors administrators counselors and policymakers in a broad range of education settings such as colleges and universities extension programs businesses libraries and museums **EcoJustice, Citizen Science and Youth Activism** Michael P. Mueller, Deborah J. Tippins, 2014-12-02 This volume draws on the ecojustice citizen science and youth activism literature base in science education and applies the ideas to situated tensions as they are either analyzed theoretically or praxiologically within science education pedagogy It uses ecojustice to evaluate the holistic connections between cultural and natural systems environmentalism sustainability and Earth friendly marketing trends and introduces citizen science and youth activism as two of the pedagogical ways ecojustice philosophy can be enacted It also comprises evidence based practice with international service community embedded curriculum teacher preparation citizen monitoring and community activism student scientist partnerships socioscientific issues and new avenues for educational research **Cultural Studies and Environmentalism** Deborah J. Tippins, Michael P. Mueller, Michiel van Eijck, Jennifer D Adams, 2010-08-05 As the first book to explore the confluence of three emerging yet critical fields of study this work sets an exacting standard The editors aim was to produce the most authoritative guide for ecojustice place based education and indigenous knowledge in education Aimed at a wide audience that includes but is not restricted to science educators and policymakers Cultural Studies and Environmentalism starts from the premise that schooling is a small part of the larger educational domain in which we live and learn Informed by this overarching notion the book opens up ways in

which home grown talents narratives and knowledge can be developed and eco region awareness and global relationships can be facilitated Incorporating a diversity of perspectives that include photography poetry and visual art the work provides a nuanced lens for evaluating educational problems and community conditions while protecting and conserving the most threatened and vulnerable narratives Editors and contributors share the view that the impending loss of these narratives should be discussed much more widely than is currently the case and that both teachers and children can take on some of the responsibility for their preservation The relevance of ecojustice to this process is clear Ecojustice philosophy is a way of learning about how we frame or perceive the world around us and why that matters Although it is not synonymous with social or environmental justice the priorities of ecojustice span the globe in the same way It incorporates a deep recognition of the appropriateness and significance of learning from place based experiences and indigenous knowledge systems rather than depending on some urgent ecological crises to advocate for school and societal change With a multiplicity of diverse voices coming together to explore its key themes this book is an important starting point for educators in many arenas It brings into better focus a vital role for the Earth's ecosystems in the context of ecosociocultural theory and participatory democracy alike Encompassing theoretical empirical and experiential standpoints concerning place based knowledge systems this unique book argues for a transformation of science education's intellectual tradition of thinking that emphasizes individual cognition In its place the book offers a wisdom tradition of thinking living and being that emphasizes community survival in harmony within itself and with Mother Earth Glen Aikenhead EcoJustice Education Rebecca A.
