Education And The Cold War The Battle For The American School:

Education and the Cold War Andrew Hartman, 2008-02-15 Shortly after the Russians launched Sputnik in 1957 Hannah Arendt quipped that only in America could a crisis in education actually become a factor in politics The Cold War battle for the American school dramatized but not initiated by Sputnik proved Arendt correct The schools served as a battleground in the ideological conflicts of the 1950s Beginning with the genealogy of progressive education and ending with the formation of New Left and New Right thought Education and the Cold War offers a fresh perspective on the postwar transformation in U S political culture by way of an examination of the educational history of that era **Education as Cold War Experience**

Andrew Hartman, 2006 **The National Council of Teachers of English and Cold War Education Policies** Curtis Mason, 2020-02-01 The launching of Sputnik in 1957 sparked an education movement that stressed the importance of curricular rigor and standardization as a means to improve education and bolster national defense Within six months of Sputnik's launch Congress passed the National Defense Education Act NDEA that approved an unprecedented amount of federal funding toward the math science and foreign language disciplines The teaching of English was left out and through the leadership of the National Council of Teachers of English NCTE the discipline maneuvered public relations and political connections in its quest to acquire federal funds In doing so the NCTE mimicked strategies that galvanized funding for math science and foreign language disciplines by arguing the importance of the teaching of English for national security and advocating for a teaching model that aligned with Cold War Era pedagogical trends These tactics marked a major shift in how the NCTE advocated for the teaching of English In the early twentieth century the organization embraced student centered education practices connected to the ideas of progressive educators This perspective continued with the creation and expansion of life adjustment education during the 1930s and 40s During this era many NCTE authors recommended this movement that advocated connecting education to future adult experiences Following Sputnik NCTE leaders supported content centered reforms Instead of curriculum recommendations based in discovering and fostering relevant student experiences the NCTE's focus became adjusting student learning to predefined skills it thought all students should possess This trend was supported by conceptions of Cold War education models including those advocated by their rival English organization the Modern Language Association MLA The MLA had successfully worked with federal actors in attaining funding for foreign language training institutes and the NCTE's collaboration with the MLA represented a shift in adopting ideas it was previously opposed to promoting Despite their efforts the NCTE was not a part of NDEA reauthorization in 1961 the federal government led by U S Commissioner of Education Sterling McMurrin funded teacher training institutes for the study of English through a program called Project English The 1960s continued with the NCTE representing stronger content centered ideas before shifting in less than a decade as indicated by the materials produced by the 1966 AngloAmerican Conference on English at Dartmouth Here NCTE leaders reassessed their beliefs after meeting with British educators who

advocated student centered curriculum models and reintroduced benefits of experiential education These ideas would manifest into studentcentered curriculum models during the late 1960s and 1970s

Encyclopedia of the Cold War Ruud van Dijk,William Glenn Gray,Svetlana Savranskaya,Jeremi Suri,Qiang Zhai,2013-05-13 Between 1945 and 1991 tension between the USA its allies and a group of nations led by the USSR dominated world politics This period was called the Cold War a conflict that stopped short to a full blown war Benefiting from the recent research of newly open archives the Encyclopedia of the Cold War discusses how this state of perpetual tensions arose developed and was resolved This work examines the military economic diplomatic and political evolution of the conflict as well as its impact on the different regions and cultures of the world Using a unique geopolitical approach that will present Russian perspectives and others the work covers all aspects of the Cold War from communism to nuclear escalation and from UFOs to red diaper babies highlighting its vast ranging and lasting impact on international relations as well as on daily life Although the work will focus on the 1945 1991 period it will explore the roots of the conflict starting with the formation of the Soviet state and its legacy to the present day

The Spiritual-Industrial Complex Jonathan P. Herzog,2011-08-05 In his farewell address Dwight D Eisenhower warned the nation of the perils of the military industrial complex But as Jonathan Herzog shows in this insightful history Eisenhower had spent his presidency contributing to another lesser known Cold War collaboration the spiritual industrial complex This fascinating volume shows that American leaders in the early Cold War years considered the conflict to be profoundly religious they saw Communism not only as godless but also as a sinister form of religion Fighting faith with faith they deliberately used religious beliefs and institutions as part of the plan to defeat the Soviet enemy Herzog offers an illuminating account of the resultant spiritual industrial complex chronicling the rhetoric the programs and the policies that became its hallmarks He shows that well known actions like the addition of the words under God to the Pledge of Allegiance were a small part of a much larger and relatively unexplored program that promoted religion nationwide Herzog shows how these efforts played out in areas of American life both predictable and unexpected from pulpits and presidential appeals to national faith drives military training barracks public school classrooms and Hollywood epics Millions of Americans were bombarded with the message that the religious could not be Communists just a short step from the all too common conclusion that the irreligious could not be true Americans Though the spiritual industrial complex declined in the 1960s its statutes monuments and sentiments live on as bulwarks against secularism and as reminders that the nation rests upon the groundwork of religious faith They continue to serve as valuable allies for those defending the place of religion in American life

Global Transformations in the Life Sciences, 1945-1980 Patrick Manning,Mat Savelli,2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the

discovery of life's molecular processes and substantive improvements in global public health and medicine. Combining perspectives from the history of science and world history, this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences. Contributors consider the long-term evolution of scientific practice, research, and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions. Together, they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests, which influenced dramatic changes in the field as the postcolonial world order unfolded.

The Hope for American School Reform Ronald W. Evans, 2010-12-14. The Hope for American School Reform tells the story of the origins of the reform in science and math education. The book is drawn in part on new research from previously untapped archival sources. The aim of this work is to contribute to our understanding of a major effort to reform school curricula.

A Christian America Restored Robert Glenn Slater, 2019-08-13. Protestant evangelical Christian schools are the fastest growing segment of American private school education. Despite their notable individual autonomy, these schools have retained a consistent belief system and mission over several decades. Private religious schools can be traced to our nation's earliest origins. Why is it that these unique educational institutions arose in twentieth-century America and have continued to thrive? A Christian America Restored seeks to delve into the beginnings of private Christian schools and discovers that while they are relatively new on the educational landscape of America, their roots are actually quite deep, connecting with the ongoing dreams of our nation's conservative evangelicals.

Facing the Crises Ljubica Matek, Jasna Poljak Rehlicki, 2014-06-26. Owing to the diverse research interests of the contributors, this collection of essays offers a varied picture of the current approaches to Anglo-American literature and culture and points to the need for a deeper understanding of current cultural, economic, and social processes in the globalizing and globalized culture of the West. Because crisis seems to be the key word of contemporary Western culture, the first part of the book, titled *In the Face of Crises*, explores the implicit or explicit idea of a crisis between the real and the simulated, suggesting that one of the major issues for the contemporary man is how to deal with the virtual or with the absence of the real. Our fast-paced, technology-laden and materialist-oriented existence brings about the need to rethink our human identity, putting into perspective our relationship to technology, the impact of capitalist economy and colonial past, as well as consequences of constant warfare. The second part of the book, *New Perspectives on Literary Genres*, analyzes forms, topics, and styles in literary texts belonging to specific, sometimes marginalized genres. Literary analyses in this section also touch upon the idea of crisis, be it the crisis of understanding and redefining a particular genre or a crisis that is inherent in the controversial topic or form of the text. As a reaction to recent allegations concerning the crisis of humanities as non-profitable, this book shows that humanist research is indispensable and crucial for understanding the human condition, making this book a relevant addition to the contemporary discussion of literature and culture.
