Evolutionary Theory Victorian Culture Control Of Nature:

, From Eve to Evolution Kimberly A. Hamlin, 2014-05-08 From Eve to Evolution provides the first full length study of American women's responses to evolutionary theory and illuminates the role science played in the nineteenth century women's rights movement Kimberly A Hamlin reveals how a number of nineteenth century women raised on the idea that Eve's sin forever fixed women's subordinate status embraced Darwinian evolution especially sexual selection theory as explained in The Descent of Man as an alternative to the creation story in Genesis Hamlin chronicles the lives and writings of the women who combined their enthusiasm for evolutionary science with their commitment to women's rights including Antoinette Brown Blackwell Eliza Burt Gamble Helen Hamilton Gardener Charlotte Perkins Gilman and Elizabeth Cady Stanton These Darwinian feminists believed evolutionary science proved that women were not inferior to men that it was natural for mothers to work outside the home and that women should control reproduction The practical applications of this evolutionary feminism came to fruition Hamlin shows in the early thinking and writing of the American birth control pioneer Margaret Sanger Much scholarship has been dedicated to analyzing what Darwin and other male evolutionists had to say about women but very little has been written regarding what women themselves had to say about evolution From Eve to Evolution adds much needed female voices to the vast literature on Darwin in America *After the Monkey Trial* Christopher M.

Rios, 2014-08-28 This study sheds light on the work of the evangelical scientists who sought to bridge the cultural divide Christianity and evolutionary theory In the well known Scopes Monkey Trial of 1925 famously portrayed in the film and play Inherit the Wind William Jennings Bryan's clashed with defense attorney Clarence Darrow The drama pitting fundamentalist fervor against aggressive agnosticism illustrated what current scholars call the conflict thesis Regardless of the actual legal question of the trial it appeared as though Christianity and science were at war with each other Decades later a new generation of evangelical scientists struggled to restore peace After the Monkey Trial is the compelling history of those evangelical scientists in Britain and America who unlike their fundamentalist cousins supported mainstream scientific conclusions of the world and resisted the anti science impulses of the era Christopher M Rios focuses on two organizations the American Scientific Affiliation and the Research Scientists Christian Fellowship today Christians in Science who for more than six decades have worked to reshape evangelical engagement with science and redefine what it means to be a creationist

Child Murder and British Culture, 1720-1900 Josephine McDonagh, 2003-12-08 In this wide ranging study Josephine McDonagh examines the idea of child murder in British culture in the eighteenth and nineteenth centuries Analysing texts drawn from economics philosophy law medicine as well as from literature McDonagh highlights the manifold ways in which child murder echoes and reverberates in a variety of cultural debates and social practices She places literary works within social political and cultural contexts including debates on luxury penal reform campaigns slavery the treatment of the poor and birth control She traces a trajectory from Swift's A Modest Proposal through to the debates on the New Woman at the

turn of the twentieth century by way of Burke Wordsworth Wollstonecraft George Eliot George Egerton and Thomas Hardy among others McDonagh demonstrates the haunting persistence of the notion of child murder within British culture in a volume that will be of interest to cultural and literary scholars alike *Forthcoming Books* Rose Arny,2004 **The Figure of Consciousness** Jill M. Kress,2013-08-21 Through analysis of metaphors of consciousness in the philosophy and fiction of William James Henry James and Edith Wharton this work traces the significance of representations of knowledge gender and social class revealing how writers conceived of the self in modern literature *Victorian Science and Victorian Values* James G. Paradis,1985 *A History of Anthropological Theory, Fifth Edition* Paul A. Erickson,Liam D. Murphy,2017-01-01 An accessible and engaging overview of anthropological theory that provides a comprehensive history from antiquity through to the twenty first century The fifth edition has been revised throughout with substantial updates to the Feminism and Anthropology section including more on Gender and Sexuality and with a new section on Anthropologies of the Digital Age Once again A History of Anthropological Theory will be published simultaneously with the accompanying reader mirroring these changes in the selection of readings so they can easily be used together in the classroom Additional biographical information about some of theorists has been added to help students **Totalitarian Science and Technology** Paul R. Josephson,2005 No Marketing Blurb *The Lysenko Effect* Nils Roll-Hansen,2005 Ukrainian agronomist Lysenko was the leader of an influential Soviet agrobiological school that rejected standard genetics and instead promoted a brand of pseudoscience that held sway among Soviet biologists for over twenty five years The dominance of Lysenko s pseudoscientific ideas has been characterized as the biggest scandal of 20th century science That it happened under a regime that took particular pride in building its policy on science makes the affair particularly interesting even for Western observers free from totalitarian governments The Soviet Union was the first country with a government policy and large scale public support for science Agricultural science was a main showcase for this unprecedented investment in science Unlike other scholars who have studied Lysenko s influence Roll Hansen argues that the corruption of Soviet biology should not be explained primarily as the result of Stalin s despotism and the willful intervention of party hacks into the objective methods of science Because of ideological and economic pressures to produce tangible benefits to society says Roll Hansen Soviet biology under Lysenko s leadership succumbed to a wishful thinking syndrome which paved the way for Lysenko By such thinking scientific objectivity was compromised in favor of ideas that accorded with progressive political ideals and economic goals as determined by the ruling politburo Roll Hansen draws provocative parallels between Lysenko s bad science in mid 20th century Russia and attempts by Western theorists today to construe science in social constructivist terms or to exercise political control over scientific research from publisher description **Evolution and Human Nature** Richard Morris,1983

H.G. Wells Steven McLean,2008 This set comprises 40 volumes covering 19th and 20th century European and American authors These volumes will be available as a complete set mini boxed sets by theme or as individual volumes This second set

complements the first 68 volume set of Critical Heritage published by Routledge in October 1995 American Book Publishing Record, 2002 **A History of Anthropological Theory** Paul A. Erickson, Liam Donat Murphy, 2008-01-01 This overview of the history of anthropological theory provides a comprehensive history from antiquity through to the twenty first century with a focus on the twentieth century and beyond Unlike other volumes it also offers a four field introduction to theory As a stand alone text or used in conjunction with the companion volume Readings for a History of Anthropological Theory Erickson and Murphy offer a comprehensive affordable and contemporary introduction to anthropological theory The third edition has been updated and fully revised throughout to closely parallel the presentation in the companion reader making it easier to use both books in tandem New original essays by contemporary theorists bring theories to life and portraits of important theorists make it a handsome volume Sources and suggested readings have been updated and glossary definitions have been updated streamlined and standardized *The Chicago Gangster Theory of Life* Andrew Ross, 1994 Strange and scary days for an ecology movement that was conceived in fierce opposition to power Fractured as ever by divisions and competing agendas the movement must now confront the dangerous tendency of those in power to invoke nature s laws as a model for social well being Partly as a result of ecology s influence biologism is back and the spectres of social Darwinism and Malthusian ideas about natural scarcity have begun to reinforce if not translate in calls for a reduction in right and freedoms in our civil society Andrew Ross s *The Chicago Gangster Theory of Life* questions the evangelical asceticism of much environmentalist thought and calls for a renewal of the libertarian post scarcity tradition Opening with a stunning essay on the ethnic and socio economic bases of cultural nationalism in the Pacific Islands he assesses the continuing historical appeal of ecological romanticism long associated with Polynesian peoples and central today to a tourist industry that is the new mode of Third World underdevelopment Turning to home he analyzes the 1933 bombing of New York s World Trade Center in the ecological context of urban development that has made the city a capital both of global finance and of new immigrant cultures In a response to the bombing and environmental terrorism of the Gulf War Ross goes on to explore the ecology of images that characterized the media s role in that war s carnage and in the mounting collateral damage of the New World Order A fourth chapter discusses the much hyped men s movement as a response to debates among eco feminists The book concludes with a sweeping critiques of the new world view being ushered in by geneticists and the biotechnology industry a philosophy of biological determinism that Ross describes as the Chicago gangster theory of life With his sharp eye for the crucial cultural phenomena of our times Ross s wry take on the contradictions of green politics is tempered by his commitment to dispel the ecology movement s public image as an anti libertarian politics that always says no and preaches self limitation rather than promising social fulfillment He sees an ecological future of public affluence and not voluntary poverty a world where nature is a participant in our social plans and not an authority locking us into some incontrovertible fate *Evolution of the Human Brain Through Runaway Sexual Selection* Geoffrey Miller, 1993 *Culture*
