*1977 National Science Foundation Authorization* United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1976      **Learning through assessment** Anita Lubbe, 2021-12-31

This book aims to contribute to the discourse of learning through assessment within a self directed learning environment. It adds to the scholarship of assessment and self directed learning within a face to face and online learning environment. As part of the NWU Self Directed Learning Book Series, this book is devoted to scholarship in the field of self directed learning, focusing on ongoing and envisaged assessment practices for self directed learning through which learning within the 21st century can take place. This book acknowledges and emphasises the role of assessment as a pedagogical tool to foster self directed learning during face to face and online learning situations. The way in which higher education conceptualises teaching, learning and assessment has been inevitably changed due to the COVID 19 pandemic, and now more than ever we need learners to be self directed in their learning. Assessment plays a key role in learning, and therefore we have to identify innovative ways in which learning can be assessed and which are likely to become the new norm even after the pandemic has been brought under control. The goal of this book, consisting of original research, is to assist with the paradigm shift regarding the purpose of assessment as well as providing new ideas on assessment strategies, methods and tools appropriate to foster self directed learning in all modes of delivery.

**Learning to School** Jennifer Wallner, 2014-05-27. Among countries in the industrialized world, Canada is the only one without a national department of education, national standards for education, and national regulations for elementary or secondary schooling. For many observers, the system seems impractical and almost incoherent. But despite a total lack of federal oversight, the educational policies of all ten provinces are very similar today. Without intervention from Ottawa, the provinces have fashioned what amounts to a de facto pan-Canadian system. *Learning to School* explains how and why the provinces have achieved this unexpected result. Beginning with the earliest provincial education policies and taking readers right up to contemporary policy debates, the book chronicles how, through learning and cooperation, the provinces gradually established a country-wide system of public schooling. A rich and ambitious work of scholarship, it will appeal to readers seeking fresh insights on Canadian federalism, education policy, and policy diffusion.
