Public Policy in International Economic Law Diane Desierto, 2015-02-19 States reject inequality when they choose to ratify the International Covenant on Economic Social and Cultural Rights ICESCR but to date the ICESCR has not yet figured prominently in the policy calculus behind States international economic decisions This book responds to the modern challenge of operationalizing the ICESCR particularly in the context of States decisions within international trade finance and investment Differentiating between public policy mechanisms and institutional functional mandates in the international trade

finance and investment systems this book shows legal and policy gateways for States to feasibly translate their fundamental duties to respect protect and fulfil economic social and cultural rights into their trade finance and investment commitments agreements and contracts It approaches the problem of harmonizing social protection objectives under the ICESCR with a State s international economic treaty obligations from the designing and interpreting international treaty texts up to the institutional monitoring and empirical analysis of ICESCR compliance In examining public policy options the book takes into account around five decades of States implementation of social protection commitments under the ICESCR its normative evolution through the UN Committee on Economic Social and Cultural Rights and the Committee s expanded fact finding and adjudicative competences under the Optional Protocol to the ICESCR as well as the critical dialectical and deliberative roles of diverse functional interpretive communities within international trade finance and investment law Ultimately the book shoes how States ICESCR commitments operate as the normative foundation of their trade finance and investment decisions

Finance and the Macroeconomics of Environmental Policies P. Arestis,M. Sawyer,2015-01-29 This volume examines current and previous environmental policies and suggests alternative strategies for the future Addressing resource depletion and climate change are pressing priorities for modern economies Planning energy infrastructure projects is complicated by uncertainty as such clear government policies have a crucial role to play *Why States Recover* Greg Mills,2015-01-03 State failure takes many forms Somalia offers one extreme The country s prolonged civil war led to the collapse of central authority with state control devolving to warlord led factions that competed for the spoils of local commerce political power and international aid Malawi on the other hand is at the other end of the scale During President Bingu s second term in office the country s economy collapsed as a result of poor policies and Bingu s brand of personal politics On the surface Malawi s economy seemed largely stable underneath however the polity was fractured and the economy broken In between these two extremes of state failure are all manner of examples many of which Mills explores in the fascinating and profoundly personal *Why States Recover* Throughout he returns to his key questions how do countries recover What roles should both insiders and outsiders play to aid that process Drawing on research in more than thirty countries and incorporating interviews with a dozen leaders Mills examines state failure and identifies instances of recovery in Latin America Asia and Africa For anyone interested in the reasons behind states failure and remedies to ensure future economic stability it is important reading *Today's Nutrition and Tomorrow's Public Health: Challenges and Opportunities* Irene Lenoir-Wijnkoop,Iñaki Gutiérrez-Ibarluzea,Dominique J. Dubois,2016-04-29 At the dawn of the third millennium we are confronted with a disturbing phenomenon although global life expectancy still increases this is not the case for healthy life expectancy The explanation of this seemingly contradiction is mainly due to the rising prevalence of the new pandemia of chronic non communicable diseases NCDs Even in low and middle income countries the improvement in healthcare status and life expectancy is paralled by the increase of NCDs as in all countries worldwide Since the United Nations General

Assembly held in New York in 2011 many publications have emphasized the close link between NCDs and nutrition The NCDs epidemic forces us to reconsider the public health perspectives Many governments non governmental organizations and other institutions are actively involved in educational nutrition programs and campaigns however their efforts seldom obtain the results hoped for It is extremely difficult to induce changes in lifestyle and behavior that have built up over a long period of time However it becomes urgent to adapt to our changing life environment where traditional wisdom and intuitive choices are giving way to individual thinking and search for often uncontrolled information This engenders a number of unprecedented challenges and it calls for a re appraisal of the existing paradigms to achieve an adequate management of the upstream determinants of health instead of a pre dominant medical and hospital centric approach In the era of personalized healthcare it is time to empower policy makers professionals and citizens for achieving an evidence based change in the health disease interface and decision making process for public health interventions The scientific and professional society Health Technology Assessment International HTAi has recognized nutrition as a health technology preventative by creating a Interest Group IG dedicated to research on methodologies and assessments of nutrition related public health while taking into account contextual factors ethical legal social organizational economic in order to generate meaningful outcomes for establishing evidence based health policies This Research Topic aims to elaborate on some of the potential hurdles or guarantees which have to be overcome for the sake of sustainable healthcare provisions anywhere in the world such as shortcomings in methodological approaches regulatory frameworks gaps between evidence its hierarchy and final recommendations for public health management

The Macroeconomics of Fiscal Policy Richard W. Kopcke, Geoffrey Matthew Bemis Tootell, Robert K. Triest, 2006 Leading academics and former policy makers assess the effectiveness of postwar American fiscal policy as questions about the role of fiscal policy once again come to the forefront of economic research and debate The United States s post World War II emphasis on activist fiscal policy for short term economic stabilization was called into question in the 1960s and by the late 1980s was superseded by the view that fiscal policy should focus on long run structural concerns For the past two decades both public policy and economic research emphasized monetary policy as a stabilization tool But there remain issues in American macroeconomic policy having to do with budget deficits present and projected as well as a recent revival of interest in fiscal policy as a stabilization tool Overall the academic pendulum is swinging back towards a renewed consideration of fiscal policy This volume brings together leading researchers and policy makers to assess the effectiveness and consequences of fiscal policy Drawing on postwar policy experience and recent economic research this book offers a state of the art consideration of where fiscal policy stands today Contributors address both the appropriateness of fiscal policy as a tool for short run macroeconomic stabilization and the longer term impact of fiscal decisions and economic policy Topics covered include the legacy of the Reagan administration s tax cuts whether public policy has encouraged such behavior as overconsumption which may foster persistent budget and trade deficits and in light of recent experience how and when fiscal policy might be appropriate as a short term stabilization tool Contributors Alan J Auerbach Susanto Basu Olivier J Blanchard Alan S Blinder Barry P Bosworth W Elliott Brownlee William H Buiter Jonathan Coppel Jean Philippe Cotis Luiz de Mello James S Duesenberry Douglas W Elmendorf Eric Engen Jeffrey A Frankel Benjamin M Friedman Richard W Kopcke Catherine L Mann Van Doorn Ooms Rudolph G Penner Alice M Rivlin Christopher A Sims C Eugene Steuerle Geoffrey M B Tootell Robert K Triest Edwin M Truman
