[Private Voluntary Health Insurance in Development](#) Alexander S. Preker, Richard M. Scheffler, Mark C. Bassett, 2007 This volume presents findings of a World Bank review of the existing and potential role of private voluntary health insurance in low and middle income countries and is the third volume in a series of reviews of health care financing Also this volume is about managing risk Not the risk of national or man made disasters but the risk of illness The developing world is plagued by many of the historical scourges of poverty infectious disease disability and premature death As countries pass through demographic and epidemiological transition they face a new wave of health challenges from chronic diseases and accidents In this respect illness has both a predictable and an unpredictable dimension Contributors to this volume emphasize that the public sector has an important role to play in the health sector but they demonstrate that the private sector also plays a role in a context in which private spending and delivery of health services often composes 80 percent of total health expenditure Managing risks in the private sector begins at the household level Private voluntary health insurance is merely an extension of such nongovernmental ways to deal with the risk of illness and its impoverishing

effects in low and middle income countries The authors examine frameworks for analyzing health financing and health insurance They conclude that most studies are hampered by lack of data on the impact of private voluntary health insurance on broad social goals such as financial protection They find no overall consensus on the impact of voluntary health insurance on public health activities or on the quality innovation and efficiency of personal health services Forthcoming Books Rose Army,2003 **Bulletin of the World Health Organization** World Health Organization,2006 UN Millennium Project: Who's got the power? ,2005 *The Lancet* ,2006 Pharmaceutical Reform Marc J. Roberts,2011-09-21 This book applies an established analytical framework for health sector reform Getting Health Reform Right Oxford 2004 to the performance problems of the pharmaceutical sector The book is divided into three sections The first section presents the basic ideas for analysis It begins by insisting that reform start with a clear understanding of the performance deficiencies of the current system Like all priority setting in the public sector this definition of the problem involves both ethical choices and political processes Early chapters explain the foundations of these ideas and apply them to the pharmaceutical sector The relationship of ultimate outcomes like health status or risk protection to classic health systems concepts like efficiency access and quality is also explored The last chapter in the first part is devoted to diagnosis explaining how to move from the definition of a problem to an understanding of how the functioning of the system produces the undesirable outcomes in question The second part of the book devotes one chapter to each of five control knobs finance payment organization regulation and persuasion These are sets of potential interventions that governments can use to improve pharmaceutical sector performance Each chapter presents basic concepts and discusses examples of reform options Throughout we provide conditional guidance avoiding the approach of a one size fits all model of best practices in these five arenas for reform Instead we stress the need for local knowledge of political systems administrative capacities community values and market conditions in order to design pharmaceutical sector policies appropriate to a country s particular circumstances The last part of the book is a set of teaching cases Each is preceded by questions and is followed by a brief note on the lessons to be learned The goal is to help readers develop the skills they need to deal effectively with pharmaceutical sector reform problems in their own countries
