hardware alone matched high end Mac and Windows computers but the software is where the Pixelbook really shines In addition to Google Assistant a Siri like tool for productivity the computer also is amongst the first Chromebooks to be able to run Android apps combined with a convertible touchscreen this means you can leave your tablet at home For a better comparison of how the computer ranks against Windows and Mac see Appendix A In 2018 Google was at it again This time their interest had shifted from hybrid laptop tablet to full on tablet with the Google Pixel Slate It seemed like a direct response to what Google sees as their biggest threat the iPad and Microsoft Surface If you've used any computer then both the Pixelbook and Slate will be easy enough to use as soon as you open it up for the first time If you really want to take advantage of all the features and be as productive as possible then this guide will help Almost everything in this book will also apply to other Chromebooks Let's get started
