 Richard Padovan,2002-09-11 This handbook provides readers with a well illustrated and readable comparative guide to
 proportion systems in architecture setting out the mathematical principles that underlie the main systems and illustrating
 these with examples of their use in historical and modern buildings The main body of the text traces the interplay of
 abstraction and empathy through the history of science philosophy and architecture from the early Greeks through to the two
 early twentieth century architects who made proportion the focus of their work Le Corbusier and Van der Laan The book
 ends with a reflection on the present and future role of proportion in architecture Oudheidkundig jaarboek Koninklijke

Concept and Identity Esteban Fernández-Cobián,2014-10-02 The identity of places of worship is one of the most difficult
 problems faced by religious architecture at the start of this new millennium Contemporary globalising experiences demand
 peremptorily a reflection both conceptual and situational on the origin of objects people and institutions Nevertheless the
 chance of these migration flows annihilating already existing religious identities is perceived as a problem This problem is
 directly linked to the survival of architecture as a system carrying a material representation of the divine and constituting a
 self reference system for the community of believers Therefore it is important to define the extent to which the new religious
 architecture has given room to an abstract type of formal experimentation which is disconnected from social reality Does this
 architecture maintain its bridging sacramental value or on the contrary has it given way to the conceptualist trends still alive
 in the artistic world Is metaphor a valid concept for the Christian religion Is there an essential aspect linking this
 architecture to the centuries old tradition of the Catholic Church Different architectural pedagogical exhibition and formal
 initiatives have arisen in recent years and it is necessary to get to know them with the purpose of understanding where
 contemporary religious architecture is heading in its eternal search for a permanent identity Mystery and Matter Michel
 Remery,2010-12-20 Most of the scholarship regarding the Dutch monk and architect Dom Hans van der Laan OSB 1904 1991
 has been narrowly focused on his architectural theory and projects The liturgical and theological dimensions have been
 virtually neglected though they are vital for a proper understanding of his thought Through a thorough reading of the
 original sources including previously unexplored documents from various archives this book takes an interdisciplinary
 approach to Van der Laan s theory It brings together the different aspects of his work by studying both the liturgical
 theological and architectural elements On this basis the book offers a synthesis of the way in which Van der Laan was able to
 link earthly matter to the divine Mystery Four Windows of Opportunity Johannes de Vries,Joh. de Vries,1995
