Getting Reading Right From The Start Effective Early Literacy Interventions:

Getting Reading Right from the Start Elfrieda H. Hiebert, Barbara M. Taylor, 1994 This edited book brings together descriptions of seven literacy intervention programs used by experts to prevent early reading failure in grades K 1 Programs focus on story book reading and writing with attention to word level strategies and are developmental not remedial Early childhood literacy diagnosis and treatment of reading difficulties Off Track Louise Spear-swerling, 2018-03-05 The identification of poor readers as learning disabled can be the first of many steps toward consigning students to a lifetime of reading failure The very label that is meant to help children often becomes a burden that works against effective learning throughout their schooling In this book the authors identify the dangers of labeling children as reading or learning disabled contending that a reading disability is not a unitary phenomenon In order to diagnose and help children educators and parents need to understand the multiple sources of reading difficulty before they can choose appropriate means to correct it Drawing on recent research in cognitive psychology the authors present a new theoretical model of reading disability that integrates a wide variety of findings across age and grade spans Laid out in terms that are readily comprehensible to parents and practitioners the model outlines the phases that are characteristic of the path to proficient reading then describes four ways in which disabled readers may stray from this path The key to the authors work lies in the fact that youngsters who stray from the path of typical reading acquisition often are not distinguishable from other children who are classified as poor readers rather than as learning disabled This model is an especially useful one for practitioners because it both provides a broader view of reading disability than have many previous models and shows how reading disability relates to typical reading acquisition Using illustrative case studies the authors describe the four patterns of reading disability explain how to properly assess them and suggest ways to conquer them Intervention Strategies to Follow Informal Reading Inventory Assessment JoAnne Schudt Caldwell, Lauren Leslie, 2005 Includes workable activities for intervention sessions based on specific assessment results Written by JoAnne Caldwell and Lauren Leslie authors of the Qualitative Reading Inventory Will help to specifically connect performance on a informal reading inventory to related and practical intervention strategies Reading specialists K 12 literacy pre service and in service teachers *Addressing the Needs of Struggling Readers* Jeeva Ratna Roche-Smith, 1998 Early Literacy Instruction Elfrieda H. Assessing the Effectiveness of a Literacy Tutoring Intervention Adapted for Small Group Instruction with First Graders Randall Christopher Osuna, 2000 Researchers in the field of literacy have suggested that using tutoring approaches with small groups of children instead of one child at a time might improve cost effectiveness while still producing significant gains better than standard classroom instruction Fifty one first graders of middle socioeconomic status at an urban public elementary school were identified as being at risk for future reading difficulties The pre and post treatment assessment battery consisted of five measures developed by Marie Clay to assess a child's ability across five different reading and reading related tasks Letter Identification Word Test Writing Vocabulary Dictation and Text Reading Level Subjects were randomly assigned to one of two conditions The experimental subjects were divided into groups of four to five and received a small group adaptation of the Reading Recovery program The control subjects were divided into small groups of four to six and received the school district's standard reading instruction from their respective teachers The results suggested that for at risk readers a reading instruction program in which a Reading Recovery specialist tutored small groups was more effective than classroom instruction in which teachers worked with small groups of children from their own classroom F 5 45 9 232 p
