These efforts and trends are treated under the term electronic supply chain management (E SCM). There are three major critical success factors for the successful operation of an electronic supply chain. These can be clustered into decision motivation (e.g. a shared vision and a strong motivation), implementation process (e.g. the tight integration of inter-organizational information systems and the re-engineering of inter-organizational business processes and infrastructure conditions (e.g. agreement upon a shared industry standard)). There are numerous benefits of an E SCM implementation, such as increased communication speed and decreased cost in terms of communication, inventory, and customer service.
