Model 2: Another plan is to solve the other member function using a table and solve using the values of the half-sine on the right. The complete data set for Model 2 is modeled by the equation $y = 100 \sin(\pi x / 25)$ and the mathematical model for the cable is $y = -x^2 + 125$. The cable and the steel cable intersect at $x = 125.750$.

Introduction to Probability and Statistics William Mendenhall, Robert J. Beaver, Barbara M. Beaver, 2009 While retaining the straightforward presentation and traditional outline for descriptive and inferential statistics this 13th edition incorporates learning aids to ensure that students learn and understand the relevance of the material Probability and Statistics Michael J. Evans, Jeffrey S. Rosenthal, 2004 Unlike traditional introductory math stat textbooks *Probability and Statistics The Science of Uncertainty* brings a modern flavor based on incorporating the computer to the course and an integrated approach to inference From the start the book integrates simulations into its theoretical coverage and emphasizes the use of computer powered computation throughout Math and science majors with just one year of calculus can use this text and experience a refreshing blend of applications and theory that goes beyond merely mastering the technicalities They ll get a thorough grounding in probability theory and go beyond that to the theory of statistical inference and its applications An integrated approach to inference is presented that includes the frequency approach as well as Bayesian methodology Bayesian inference is developed as a logical extension of likelihood methods A separate chapter is devoted to the important topic of model checking and this is applied in the context of the standard applied statistical techniques Examples of data analyses using real world data are presented throughout the text A final chapter introduces a number of the most important stochastic process models using elementary methods Note An appendix in the book contains Minitab code for more involved computations The code can be used by students as templates for their own calculations If a software package like Minitab is used with the course then no programming is required by the students Elements of Probability and Statistics.
