Fascinating Mathematical People Interviews And Memoirs:

Fascinating Mathematical People Donald J. Albers, Gerald L. Alexanderson, 2011-09-06 Top mathematicians talk about their work and lives Fascinating Mathematical People is a collection of informal interviews and memoirs of sixteen prominent members of the mathematical community of the twentieth century many still active The candid portraits collected here demonstrate that while these men and women vary widely in terms of their backgrounds life stories and worldviews they all share a deep and abiding sense of wonder about mathematics Featured here in their own words are major research mathematicians whose cutting edge discoveries have advanced the frontiers of the field such as Lars Ahlfors Mary Cartwright Dusa McDuff and Atle Selberg Others are leading mathematicians who have also been highly influential as teachers and mentors like Tom Apostol and Jean Taylor Fern Hunt describes what it was like to be among the first black women to earn a PhD in mathematics Harold Bacon made trips to Alcatraz to help a prisoner learn calculus Thomas Banchoff who first became interested in the fourth dimension while reading a Captain Marvel comic relates his fascinating friendship with Salvador Dal and their shared passion for art mathematics and the profound connection between the two Other mathematical people found here are Leon Bankoff who was also a Beverly Hills dentist Arthur Benjamin a part time professional magician and Joseph Gallian a legendary mentor of future mathematicians but also a world renowned expert on the Beatles This beautifully illustrated collection includes many photographs never before published concise introductions by the editors to each person and a foreword by Philip J Davis

Limitless Minds Anthony Bonato, 2018-10-24 Every mathematician is a person with a story Limitless Minds tells those stories in an engaging way by featuring interviews with twelve leading mathematicians They were invited to answer some key questions such as Who and what were the influences that pointed them towards mathematics Why do mathematicians devote their lives to discovering new mathematics How do they see mathematics evolving in the future The book written in an accessible style and enriched by dozens of images offers a rare insight into the minds of mathematicians provided in their own words It will enlighten and inspire readers about the lives passions and discoveries of mathematicians

A History of Mathematics in the United States and Canada David E. Zitarelli, 2022-10-25 This is the first truly comprehensive and thorough history of the development of mathematics and a mathematical community in the United States and Canada This first volume of the multi volume work takes the reader from the European encounters with North America in the fifteenth century up to the emergence of a research community the United States in the last quarter of the nineteenth In the story of the colonial period particular emphasis is given to several prominent colonial figures Jefferson Franklin and Rittenhouse and four important early colleges Harvard Qu bec William Mary and Yale During the first three quarters of the nineteenth century mathematics in North America was largely the occupation of scattered individual pioneers Bowditch Farrar Adrain B Peirce This period is given a fuller treatment here than previously in the literature including the creation of the first PhD programs and attempts to form organizations and found

journals With the founding of Johns Hopkins in 1876 the American mathematical research community was finally and firmly founded The programs at Hopkins Chicago and Clark are detailed as are the influence of major European mathematicians including especially Klein Hilbert and Sylvester Klein s visit to the US and his Evanston Colloquium are extensively detailed The founding of the American Mathematical Society is thoroughly discussed David Zitarelli was emeritus Professor of Mathematics at Temple University A decorated and acclaimed teacher scholar and expositor he was one of the world s leading experts on the development of American mathematics Author or co author of over a dozen books this was his magnum opus sure to become the leading reference on the topic and essential reading not just for historians In clear and compelling prose Zitarelli spins a tale accessible to experts generalists and anyone interested in the history of science in North America

Headstrong Rachel Swaby, 2015-04-07 Fifty two inspiring and insightful profiles of history s brightest female scientists Rachel Swaby s no nonsense and needed Headstrong dynamically profiles historically overlooked female visionaries in science technology engineering and math Elle In 2013 the New York Times published an obituary for Yvonne Brill It began She made a mean beef stroganoff followed her husband from job to job and took eight years off from work to raise three children It wasn t until the second paragraph that readers discovered why the Times had devoted several hundred words to her life Brill was a brilliant rocket scientist who invented a propulsion system to keep communications satellites in orbit and had recently been awarded the National Medal of Technology and Innovation Among the questions the obituary and consequent outcry prompted were Who are the role models for today s female scientists and where can we find the stories that cast them in their true light Headstrong delivers a powerful global and engaging response Covering Nobel Prize winners and major innovators as well as lesser known but hugely significant scientists who influence our every day Rachel Swaby s vibrant profiles span centuries of courageous thinkers and illustrate how each one s ideas developed from their first moment of scientific engagement through the research and discovery for which they re best known This fascinating tour reveals 52 women at their best while encouraging and inspiring a new generation of girls to put on their lab coats
