Questions

Textbook Notes

Notice that I left this blank. I don't fill it in until I am finished with the chapter.

D. Measurement - Looking for some certain things.

Example: Student who is weighed on scale.

1. Reliability: consistency of a measure.
2. Validity: does a measure truly assess quality that it is claimed to measure? Truthfulness of a measure.

3. Accuracy: Agreement with a known standard (process of calibration).

Focus remains with these two because the 3rd will often be disputed.

E. Testable Questions -

- Can hypothesis/claim be falsified at least in principle (Notion of falsifiability) by Carl

F. Public Reporting: Many places they can publish.

- Peer Reviewed journals (most esteemed).
- Sci are proud and want to get it out
- Want yr establish reputation
- We have to be aware of knowledge in order to advance and build on science.
- Allows others to make their own judgments even if original peer review.
- Allows sci to learn about findings and evaluate quality of

Monitor in Psychology Magazine

I titled this section "Questions" but I often write other misc things that I want to remember here. I think of it as a multi-purpose column

I didn't hear the last name of someone the professor mentioned during lecture so I left a blank space. If I think the name is important I can fill it in later if its mentioned or I know what to ask the prof later on.

Psychological Science (Peer Reviewed journal)

When I take a break from reading, I like to leave a note to remind me where I left off.

I highlight key terms that I think might be important

3. Possible limits of "free choice".
B. Science makes systematic observations

• Scientists' systematic observations include:

- a. precise definitions of phenomena being observed
- b. reliable + valid measuring tools that yield useful + interpretable data.
- c. generally accepted methodological
- d. System of logic for drawing conclusions and fitting those into general theories.

C. Science Produces Public Knowledge.

• An objective observation is someone who is completely objective (like Peirce thought). It just means something that can be verified by more than 1 observer.

- Done through replication where someone redoes another's study and gets same results.

• Replication can only be done if they know precisely what was done. This is done by rules that are found in Publication Manual of APA.

• Introspection: a form of precise self-report.

- The problem w/ introspect is that its subjective and not verifiable.
- John B. Watson concluded that something can only be "scientific" if its directly observable and can be verified

• Watson felt behavior was the key for this. So he became the founder of behaviorism.

Now we observe behavior instead of introspect.

D. Science produces Data-Based Conclusions -

• Scientists are data-driven

- Conclusions about behavior need to be supported by some evidence.

I failed to do this in my template, but its always a good idea to include your name and a way to contact you, so if your notes get lost they can be returned to you

World Cultures & Geography, Grades 6-8 Reading Study Guide Eastern Hemisphere Bednarz, 2002 **Creating America**, 2002-02-02 **Revolution, Counterrevolution and Assassination Through World War II** Robert C. Cottrell, 2024-12-13 Since the French Revolution the quest for revolutionary transformation and the fear of such change became deeply ingrained in the global landscape through World War II Modern revolutions inspired counterrevolutions that strove to turn back time to an allegedly purer finer more moral period than the upheaval and anarchy linked to a revolutionary epoch Revolutions often occurred through violence and entailed a disruption of existing social economic and political orders Counterrevolutions were equally guilty and frequently more so of horrific bloodletting in the name of restoring law and order often by shredding legal and ethical norms Drawing from a vast array of sources both primary and secondary this first of a two volume set presents a highly detailed narrative of an unholy trinity revolution counterrevolution and assassination Combining intellectual political social and cultural history this book highlights international protagonists movements and ideas supporting the radical or reactionary upheaval of society and the means that have been used to do so

Totalitarianism and Political Religions Volume III Han Maier, 2008 **Colin Jordan and Britain's Neo-Nazi Movement** Paul Jackson, 2016-12-15 Colin Jordan and Britain's Neo Nazi Movement casts fresh light on one of post war Britain's most notorious fascists using him to examine the contemporary history of the extreme right The book explores the wide range of neo Nazi groups that Colin Jordan led contributed to and inspired throughout his time as Britain's foremost promoter of Nazi ideology In a period stretching from the close of the Second World War right up to the 2000s Colin Jordan

became politically engaged with a multitude of Nazi inspired extremist groups either as leader or as a key protagonist. Moreover, Jordan also developed critical relationships with larger competitor extreme right organisations and parties including the Mosley's Union Movement, the National Front, and the most recent incarnation of the British National Party. He fostered a number of transnational links throughout his years of activism as well, especially with American neo Nazis. In recent years, his writings and somewhat idealised profile have been adopted by more contemporary extremist organisations such as the British People's Party and a rekindled British Movement who look to Jordan as an inspirational figure for their own reconfigurations of a National Socialist agenda. By examining this history drawing on a wide range of fresh primary sources, Colin Jordan and Britain's Neo Nazi Movement offers a new analysis on the nature and workings of Nazi inspired political extremism in post war Britain. It is an important study for anyone interested in the history of fascism, extreme ideologies, and the political and social history of Britain since the Second World War.

Landscape and Memory in Post-Fascist Italian Film Giuliana Minghelli, 2014-06-11. This study argues that neorealism's visual genius is inseparable from its almost invisible relation to the Fascist past, a connection inscribed in cinematic landscapes. While largely a silent narrative, neorealism's complex visual processing of two decades of Fascism remains the greatest cultural production in the

service of memorialization and comprehension for a nation that had neither a Nuremberg nor a formal process of reconciliation Through her readings of canonical neorealist films Minghelli unearths the memorial strata of the neorealist image and investigates the complex historical charge that invests this cinema This book is both a formal analysis of the new conception of the cinematic image born from a crisis of memory and a reflection on the relation between cinema and memory Films discussed include *Ossessione* 1943 *Paisà* 1946 *Ladri di biciclette* 1948 and *Cronaca di un amore* 1950
