Fast Policy Experimental Statecraft At The Thresholds Of Neoliberalism

Neil Brenner

Fast Policy Experimental Statecraft At The Thresholds Of Neoliberalism:

Fast Policy Jamie Peck, Nik Theodore, 2015-04-15 We inhabit a perpetually accelerating and increasingly interconnected world with new ideas fads and fashions moving at social media speed New policy ideas especially ideas that work are now able to find not only a worldwide audience but also transnational salience in remarkably short order Fast Policy is the first systematic treatment of this phenomenon one that compares processes of policy development across two rapidly moving fields that emerged in the Global South and have quickly been adopted worldwide conditional cash transfers a social policy program that conditions payments on behavioral compliance and participatory budgeting a form of citizen centric urban governance Jamie Peck and Nik Theodore critically analyze the growing transnational connectivity between policymaking arenas and modes of policy development assessing the implications of these developments for contemporary policymaking Emphasizing that policy models do not simply travel intact from sites of invention to sites of emulation they problematize fast policy as a phenomenon that is real and consequential yet prone to misrepresentation Based on fieldwork conducted across six continents and in fifteen countries Fast Policy is an essential resource in providing an extended theoretical discussion of policy mobility and in presenting a methodology for ethnographic research on global social policy **Entrepreneurial**

Governance in the Neoliberal Era Oliver Cowart, 2021-09-30 Against the background of a growing tendency among state and local governments in the United States to vie against one another spending public funds and foregoing corporate tax revenues in order to attract private investment this book offers an analysis of local economic development and business recruitment in the automotive industry Asking why localities felt they could and more importantly should make deals with private capital in the first place this book examines the shift toward entrepreneurial local governance from a global and historically informed perspective Through a study of the 19 greenfield automotive assembly plants constructed in the United States during the neoliberal era the author draws on interviews with corporate and government elites to chart the connections between increasingly global competitive industry pressures and changing attitudes toward incentivizing private investment Studying the development of an approach that has partially reoriented local governments away from managing localities and towards helping manage transnational capital flows by absorbing some of the increasing risk of long term capital investment Entrepreneurial Governance in the Neoliberal Era will appeal to scholars of sociology politics and urban studies with interests in globalization the sociology of work and industry the sociology of development and neoliberal governance *Debating the Neoliberal City* Gilles Pinson, Christelle Morel Journal, 2017-04-21 The concept of the neoliberal city has become a key structuring analytical framework in the field of urban studies It explains both the ongoing transformation of urban policies and the socio spatial effects of these policies within cities and highlights the prominent role of cities in the new geography of capitalism Bringing together a team of leading scholars this book challenges the neoliberal city thesis It argues that the definition of neoliberalization may be more complex than it seems resulting in over simplified

explanations of some processes such as the rise of metropolitan governments or the importance given to urban economic development policies or gentrification As a structuralist and macro level theory the neoliberal city does not shed light upon micro level processes or identify and analyze actors logics and practices Finally the concept is profoundly influenced by the historical trajectories of the United Kingdom and the United States and the generalization of this experience to other contexts often leads to a kind of academic ethnocentrism This book argues that on its own the current conceptualizations of neoliberalization are insufficient Instead it should be analyzed alongside other transformative processes in order to provide an analytical framework to explain the variety of processes of change motivations and justifications too easily labelled as urban neoliberalism This unique and critical contribution will be essential reading for students and scholars alike working in Human Geography Urban Studies Economics Sociology and Public Policy

Disability and Neoliberal State Formations Karen Soldatic, 2018-08-06 Disability and Neoliberal State Formations explores the trajectory of neoliberalism in Australia and its impact on the lives of Australians living with disability including Aboriginal and Torres Strait Islander peoples It examines the emergence intensification and normalisation of neoliberalism across a 20 year period distilling the radical changes to disability social security and labour market law policy and programming and the enduring effects of the incremental tightening of disability eligibility carried out by Australian governments since the early 2000s Incorporating qualitative interviews with disabled people disability advocates services and the policy elite alongside extensive documentary material this book brings to the fore the compounding effects of neoliberal reforms for disabled people s wellbeing and participation The work is of international significance as it illustrates the importance of looking beyond the UK EU and the USA to critically understand the historical development and policy mobility of disability neoliberal retraction from smaller economies such as Australia to the global economic centre

Public Education, Neoliberalism, and Teachers Paul Bocking, 2020-04-02 From pressure to teach to the test and the use of quantitative metrics to define education quality to the rise of school choice and the shift of principals from colleagues to managers teachers in New York Mexico City and Toronto have experienced strikingly similar challenges to their professional autonomy By visiting schools and meeting teachers government officials and union leaders Paul Bocking identifies commonalities that are shaping how teachers work and public schools function While arguing that neoliberal education policy is a dominant trend transcending the realities of school districts states or national governments Bocking also demonstrates the importance of local context to explain variations in education governance especially when understanding the role of resistance led by teachers unions

Critique of Urbanization Neil Brenner, 2016-12-05 Urbanization is transforming the planet within and beyond cities at all spatial scales In this book Neil Brenner mobilizes the tools of critical urban theory to deconstruct some of the dominant urban discourses of our time which naturalize and thus depoliticize the enclosures exclusions injustices and irrationalities of neoliberal urbanism In so doing Brenner advocates a constant reinvention of the framing categories methods and assumptions of critical urban

theory in relation to the rapidly mutating geographies of capitalist urbanization Only a theory that is dynamic which is constantly being transformed in relation to the restlessly evolving social worlds and territorial landscapes it aspires to grasp can be a genuinely critical theory **Virtues as Integral to Science Education** Wayne Melville,Donald Kerr,2020-09-02 By investigating the re emergence of intellectual moral and civic virtues in the practice and teaching of science this text challenges the increasing professionalization of science questions the view of scientific knowledge as objective and highlights the relationship between democracy and science Written by a range of experts in science the history of science education and philosophy the text establishes the historical relationship between natural philosophy and the Aristotelian virtues before moving to the challenges that the relationship faces with the emergence and increasing hegemony brought about by the professionalization of science Exploring how virtues relate to citizenship technology and politics the chapters in this work illustrate the ways in which virtues are integral to understanding the values and limitations of science and its role in informing democratic engagement The text also demonstrates how the guiding virtues of scientific inquiry can be communicated in the classroom to the benefit of both individuals and wider societies Scholars in the fields of Philosophy of Science Ethics and Philosophy of Education as well as Science Education will find this book to be highly useful **Drugs, Law, People, Place and the State** Stewart Williams,Barney Warf,2017-10-02 Though any psychoactive substance can be revered or reviled as a drug as people s cultural norms shift ultimately its status is determined in law by the state This publication explores the regulation of drugs alcohol and cannabis to heroin and cocaine and practices such as social drinking and public injecting under political regimes Drugs are discussed in their geographical contexts the colonial legacy of cannabis prohibition for bioprospecting in Africa the veracity of the persistent notion of the narco state Turkey s governance of drinking amid civil unrest and alcohol s place in the neoliberal political economy of Ireland In addition drug policies are examined from problems in managing drug related litter in the UK to supervised injecting facility provision in Australia harm reduction in Canada and the global network of drug policy activists Place is significant but porous borders territorial overlaps and multi scalar linkages are influential in remaking the world through current challenges to the war on drugs This book was originally published as a special issue of *Space Polity* *Remaking the Global Economy* Jamie Peck,Henry Wai-Chung Yeung,2003-08-21 With a bibliography pp 231 252 *The Internationalization Process* Jan-Evert Nilsson,Peter Dicken,Jamie Peck,1996-02-28 How are the European corporations responding to international competition What are the implications for future corporate structure employment and uneven development These are the central concerns of *The Internationalization Process* developed from a four year research programme Regional and Urban Restructuring in Europe carried out under the aegis of the European Science Foundation The carefully selected group of corporate case studies demonstrates how changing functional and geographical divisions of labour are related to complex forces operating within and beyond the confines of Europe The case studies examined range from the telecoms supplier Alcatel to the machine tool producers Gildemeister and

Maho from the pharmaceuticals giant SmithKline Beecham to the privatized steel producer British Steel Building from a shared conceptual base the eight corporate case studies illustrate how internationalization strategies are related to the nature of the firm's product or service and to the characteristics of its production process

Reviewing **Fast Policy Experimental Statecraft At The Thresholds Of Neoliberalism**: Unlocking the Spellbinding Force of Linguistics
