SQL Server 2008 is a much more significant update than SQL Server 2005 because it brings increased ability to deliver data across more platforms and thus many different types of devices. New functionality also allows for easy storage and retrieval of digitized images and video. These attributes address the recent explosion in the popularity of web-based video and server and desktop virtualization. The Real MCTS SQL Server 2008 Exam 70-432 Prep Kit prepares readers for the Microsoft Certified Technology Specialist exam SQL Server 2008 Implementation and Maintenance. This is The Real Microsoft Exam Prep Kit and provides the reader with independent and unbiased exam tips and warnings everything they need to know to ensure certification success. Fast Track to MDX Mark Whitehorn, Robert Zare, Mosha Pasumansky, 2007-12-29 IloveBusinessIntelligence IloveBI because it is all about becoming better. BI is all about empowering us with knowledge and that knowledge is the power to realize our full potential. As Zorge the spy said, knowledge is power and who doesn't love to have the power to know to understand and to make intelligent decisions? I do. Since the dawn of the modern information system, it was obvious that the information accumulated in the machine is wasted if there is no way to analyze it and learn from it. From as early as the 1950s, data analysis systems and later decision support systems were designed, developed, and deployed with that intent. However, only in the last decade have these systems become both reasonably affordable and mainstream and their business impact indisputable. The last decade has also seen the emergence of OLAP as the centerpiece of the BI technologies. The OLAP multidimensional databases combine incredible performance with unsurpassed analytical power and in my opinion are the foundation of the BI platform. While the performance differences between the multidimensional databases and the traditional relational databases are very significant, Moore's law, which states that the hardware computing power doubles every 18 months, renders this advantage of the OLAP databases temporary. Sooner or later, the raw computing power of the common server machines will be sufficient to provide the performance needed for sophisticated analysis even when the data is stored in a relational database.
