## **Fat The Anthropology Of An Obsession:**

**Fat** Don Kulick, Anne Meneley, 2005-01-13 An eclectic and highly original examination of one of the most dynamic concepts and constructs in the world With more than one billion overweight adults in the world today obesity has become an epidemic But fat is not as straightforward or even as universally damned as one might think Enlisting thirteen anthropologists and a fat activist editors and anthropologists Don Kulick and Anne Meneley have produced an unconventional and unprecedented examination of fat in various cultural and social contexts In this anthology these writers argue that fat is neither a mere physical state nor an inert concept Instead it is a construct built by culture and judged in courts of public opinion courts whose laws vary from society to society From the anthropology of fat talk among teenage girls in Sweden to the veneration of Spam in Hawaii from fear of the fat sucking pishtaco vampire in the Andes to the underground allure of fat porn stars like Supersize Betsy this anthology provides fresh perspectives on a subject more complex than love handles and less easily understood than a number on a scale Fat proves that fat can be beautiful evil pornographic delicious shameful ugly or magical It all depends on who and where you are Fat Christopher E. Forth, Alison Leitch, 2014-04-10 Fat In contemporary society the word never fails to elicit powerful emotions especially as it relates to bodily health and appearance But fat is a noun as well as an adjective and has a cultural life outside of its relationship with the human body By focusing on the complex physical and experiential dimensions of this problematic substance Fat Culture and Materiality breaks new ground in the study of the relationship between culture and the material world With contributions from well respected international scholars this innovative and interdisciplinary collection will appeal to a wide range of readers interested in fat and its relationship to culture materiality and lived experience The volume addresses the role of fats in a variety of cultural settings Topics include the politics of Palestinian olive oil the allure of pig fat in heritage pork the material sources of fat stereotypes in classical and biblical texts the use of harvested fat in aesthetic surgery and the status of fat in the self narratives of anorexics **The Fat Studies Reader** Esther Rothblum, Sondra Solovay, 2009-11-01 Winner of the 2010 Distinguished Publication Award from the Association for Women in Psychology Winner of the 2010 Susan Koppelman Award for the Best Edited Volume in Women's Studies from the Popular Culture Association A milestone anthology of fifty three voices on the burgeoning scholarly movement fat studies We have all seen the segments on television news shows A fat person walking on the sidewalk her face out of frame so she can't be identified as some disconcerting findings about the obesity epidemic stalking the nation are read by a disembodied voice And we have seen the movies their obvious lack of large leading actors silently speaking volumes From the government health industry diet industry news media and popular culture we hear that we should all be focused on our weight But is this national obsession with weight and thinness good for us Or is it just another form of prejudice one with especially dire consequences for many already disenfranchised groups For decades a growing cadre of scholars has been examining the role of body weight in society critiquing the underlying assumptions

prejudices and effects of how people perceive and relate to fatness This burgeoning movement known as fat studies includes scholars from every field as well as activists artists and intellectuals The Fat Studies Reader is a milestone achievement bringing together fifty three diverse voices to explore a wide range of topics related to body weight From the historical construction of fatness to public health policy from job discrimination to social class disparities from chick lit to airline seats this collection covers it all Edited by two leaders in the field The Fat Studies Reader is an invaluable resource that provides a historical overview of fat studies an in depth examination of the movement s fundamental concerns and an up to date look at its innovative research *Fat* Deborah Lupton,2013 Fat is a book about why the fat body has become so reviled and viewed as diseased the target of such intense discussion and debate about ways to reduce its size down to socially and medically acceptable dimensions It is also about the lived experience of fat embodiment how does it feel to be fat in a fat phobic society

Changing Meanings of Fat Elise Paradis,2011 This dissertation falls within a tradition that investigates the making of health related problems into social problems Using literature reviews document analysis and qualitative and quantitative coding of medical publications from 1950 to 2010 I argue that both our increasingly individualistic culture and our collective faith in science fuel the current fear of obesity and lead to the expansion of the medical discourse on fat In Part I I review the main medical research paradigm on obesity which argues that fat is bad for your health before turning to the critique of this paradigm and show how both sides of the debate use science to justify their stance I then combine both views to identify which educational strategies are most likely to be implemented and efficient The importance of stigma in the health and well being of obese people appears to be critical to this effort Part II contributes a timeline for distinct but overlapping conceptualizations of bodily fat in the medical literature and shows the massive and recent increase in medical interest in obesity From merely an individual trait fatness has become a medical problem obesity a social problem and an epidemic and has culminated in recent years into a focus on children the so called epidemic of childhood obesity This longitudinal approach to the medical literature at both the aggregate level in the PubMed database and in the most cited articles on obesity highlights the historical contingency of our cultural and medical obsession with fat meanwhile identifying the role schools are expected to play
