FANUC Digital Twin concept

A digital twin is the concept of creating a digital replica of your physical machines, production processes or shop floor layout in order to generate a number of competitive advantages.

- **Factor proof of concept:** you can test the system to confirm the theoretical logic
- **Design part programs faster:** programmers can test G-code without taking a machine out of production
- **Immersion and skills training:** no need to take the machine offline
- **Virtual commissioning:** your machine tool stays in operation, minimising downtime
- **Better customer support:** before a FANUC technician arrives, our remote customer support team can diagnose the problem
- **Digitalisation of the machine shop:** with FANUC Digital Twin you can provide end-to-end digitalisation from CAM to control, optimising process flow

Need to improve your daily or weekly output? Let FANUC CNC technology provide you with that much-needed boost.
