A Compendium of Neuropsychological Tests Esther Strauss, Elisabeth M. S. Sherman, Otfried Spreen, 2006 This compendium gives an overview of the essential aspects of neuropsychological assessment practice It is also a source of critical reviews of major neuropsychological assessment tools for the use of the practicing clinician **Guide to**

Psychological Assessment with African Americans Lorraine T. Benuto, Brian D. Leany, 2014-11-20 The movements toward cultural sensitivity and evidence based practice are watershed developments in clinical psychology As a population with a long history of substandard treatment from mental health systems African Americans have especially benefitted from these improvements But as with other racial and ethnic minorities finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge The Guide to Psychological Assessment with African Americans aims to close the evaluation therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality Expert contributors analyze scarce and far flung data identify strengths and limitations of measures and norms in their use with African American clients and advise on avoiding biases in interpreting results The editors advocate for a theory based hypothesis testing approach to assessment when empirical evidence is lacking and offer guidelines for decision making that is effective as well as ethnically aware The Guide s findings insights and practical information cover the gamut of test and diagnostic areas including IQ and personality Generalized anxiety disorder panic and phobias Neuropsychological assessment cognitive decline and dementia Mood disorders and suicidality Forensic assessment risk and recidivism Measures specific to children and adolescents Plus PTSD substance disorders eating pathology and more Expertly complementing cross cultural treatment texts the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning useful to clinical psychologists neuropsychologists and clinical social workers

Assessment of Feigned Cognitive Impairment Kyle Brauer Boone, 2021-04-13 The go to resource for clinical and forensic practice has now been significantly revised with 85% new material reflecting the tremendous growth of the field Leading authorities synthesize the state of the science on symptom feigning in cognitive testing and present evidence based recommendations for distinguishing between credible and noncredible performance A wide range of performance validity tests PVTs and symptom validity tests SVTs are critically reviewed and guidelines provided for applying them across differing cognitive domains and medical neurological and psychiatric conditions The book also covers validity testing in forensic settings and with particular populations such as ethnic and linguistic minority group members New to This Edition Numerous new authors a greatly expanded range of topics and the latest data throughout Clinical primer chapter on how to select and interpret appropriate PVTs Chapters on methods for validity testing in visual spatial processing speed and language domains and with cognitive screening instruments and personality inventories Chapter on methods for interpreting multiple PVTs in combination Chapters on additional populations military personnel children and adolescents and clinical problems dementia

somatoform conversion disorder Chapters on research methods for validating PVTs base rates of feigned mild traumatic brain injury and more

Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury Gerald Young, 2014-02-11 This book is a comprehensive analysis of the definitions concepts and recent research on malingering feigning and other response biases in psychological injury forensic disability populations It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In *Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury* Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young's immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist
