Psychopathology and Education of the Brain-injured Child: Anatomy and physiology of the central nervous system and brain injury in children Alfred A. Strauss, Laura E. Lehtinen, Newell Carlyle Kephart, 1947 *Comprehension Processes in Reading* David A. Balota, G.B. Flores d'Arcais, Keith Rayner, 2012-11-12 *Comprehension Processes in Reading* addresses the interrelationship among several areas relevant to understanding how people comprehend text. The contributors focus on the on line processes associated with text understanding rather than simply with the product of that comprehension: what people remember from reading. Presenting the latest theories and research findings from a distinguished group of contributors, *Comprehension Processes in Reading* is divided into four major sections. Each section concluding with a commentary chapter discusses a different aspect of reader understanding or dysfunction such as individual word comprehension, sentence parsing, text comprehension, and comprehension failures and dyslexia. **The Oxford Handbook of Deaf Studies in Literacy** Susan R. Written language and learning among challenged populations. Avoiding sweeping generalizations about DHH readers that overlook varied experiences, this volume takes a nuanced approach, providing readers with the research to help DHH students gain competence in reading comprehension. **The Oxford Handbook of Deaf Studies in Language** Marc Marschark, Patricia Elizabeth Spencer, 2016 Language development and the challenges it can present for individuals who are deaf or hard of hearing have long been a focus of research. Over the past 150 years but most especially near the end of the 20th and beginning of the 21st century, advances in the acquisition and development of language competencies and skills have been increasing rapidly. This volume addresses many of those accomplishments as well as remaining challenges and new questions that have arisen from multiple perspectives: theoretical, linguistic, social, emotional, neuro biological, and socio cultural. Contributors comprise an international group of prominent scholars and practitioners from a variety of academic and clinical backgrounds. The result is a volume that addresses in detail current knowledge, emerging questions, and innovative educational practice in a variety of contexts. The volume takes on topics such as discussion of the transformation of efforts to identify a best language approach: the sign versus speech debate to a stronger focus on individual strengths, potentials, and choices for selecting and even combining approaches; the effects of language on other areas of development as well as effects from other domains on language itself; and how neurological, socio cognitive, and linguistic bases of learning are leading to more specialized approaches to instruction that address the challenges that remain for deaf and hard of hearing individuals.
