6 Week Study Plan

This plan is geared towards students who just need a quick recap before their exam. It requires the Doctors In Training [Step 1 Review Course](#).

Unless otherwise specified, this study plan is intended to be used Monday-Friday. We generally recommend two days off for every five days of studying to prevent burn-out.

To have a study plan customized to fit your unique situation, please call (817) 796-0583 to set up an appointment with one of our student advisors.

WEEK	FIRST AID	Q&A	PRACTICE TESTS	DOCTORS IN TRAINING
1	First Pass (89 pgs/wk)	25 Q's daily M-F		4hr practice test (200q). If less than 45% correct, then you will require at least 12 weeks of study, and this plan will not work for you.
2	First Pass (89 pgs/wk)	25 Q's daily M-F	150 Q NBME Test on weekend	Bi-weekly Part 1 Email Q's
3	First Pass (89 pgs/wk)	25 Q's daily M-F	150 Q NBME Test on weekend	Online Review Course
4	First Pass (89 pgs/wk)	25 Q's daily M-F	150 Q NBME Test on weekend	Online Review Course
5	First Pass (89 pgs/wk)	25 Q's daily M-F	100 Q DIT predictive exam on weekend	Online Review Course

WEEK 6: WHAT TO DO IMMEDIATELY AFTER FINISHING THE DIT COURSE

Take your exam within a 5-10 day window of finishing your DIT course. During that period, you should:

- Take an 8 hour home practice test using your electronic question bank in "mixed question mode" and then brush up on weak areas indicated from results of test.
- Take your next NBME self-assessment to see how you are performing before the actual exam.
- The last 5 days before your test, re-read First Aid (a fifth of the book daily) and re-review highest-yield topics of DIT.

Strongly consider the following book choices for additional preparation:

(Use especially for the weakness areas noted by your NBME Self Assessment baseline)

- | | | |
|--|-----------------------------------|---|
| 1. Board Review Series Pathology (or Goljan Pathology) | 2. Board Review Series Physiology | 3. Lippincott Biochemistry (or Goljan Biochemistry) |
| 4. Lippincott Pharmacology | 5. Robbins Pathology Chapters 1-7 | 6. High Yield Neuroanatomy |

Important Notes:

- Because you will also be studying regular medical school material during this time, it will be best to skip around First Aid and study along with your course.
- Place a check mark on the upper right-hand corner of a page completed to keep track of what you have already done.
- Meet with a study partner 2-3 times a week to quiz each other over the First Aid pages read in previous weeks.
- Look at your med school schedule now and determine which weeks you will study less for the USMLE and which you will need to devote more time to complete the study plan.
- Each week, set aside a small amount of time to quickly review the First Aid pages that you read the previous week.
- If this plan is too difficult, then ditch the "Additional Books" and use them as reference resources when reviewing First Aid.
- If this plan is still too difficult, then bump the number of weekly questions down to 75-100q/wk.
- Our blog - The DIT Student Center - is a place where students can be confident that they are getting advice from an expert. From an Association to a Royal College Alan Craft, Keith Dodd, 2017-03-21 This book describes the history of the Royal College of Paediatrics and Child Health RCPCH covering the period from 1988 to 2014 which includes the transition from the British Paediatric Association BPA to the formation of the now established RCPCH The book contains a collection of viewpoints from paediatricians who held officer posts with the association and College through this time The authors offer insights and reflections to help the reader understand where the College is at the moment on a variety of core paediatric issues and significantly where it has come from The formation of the RCPCH from the BPA was very controversial with some members resigning from the RCP Since then the College has come a long way and is now recognised as the definitive body to speak for children's health in the UK and has forged relationships with many overseas countries It has produced influential documents and lobbied for advances in the practice of paediatrics It has reported on standards for how children should be

cared for in emergency and urgent care settings launched policy to improve how children are looked after in the secure estate and produced teaching and training materials for child protection among many other contributions to child health Finally it will be of interest to other Colleges and professional bodies as well as to Members and Fellows of the College

Why Hospitals Fail Prasad Godbole,Derek Burke,Jill Aylott,2017-06-28 This book explores the current wider political social and economic context of hospitals in the public and private sector globally and identifies the push and pull tension between the demands of the quality regulator and the requirements of health care commissioning processes This book draws on the evidence of what works to improve the quality of hospital services in the development of medical and clinical leadership models The book seeks to develop a specific paradigm shift in understanding the development of medical leaders by promoting a culture of engagement through participation and one that is defined by the experiences of medical leaders The editors examine new and emergent models of leadership and their contribution to explain effective and sustainable change and suggest that theoretical models of leadership are often unable to explain many of the practice led challenges presented in hospitals It will be useful reading for specialists seeking to develop their own learning as a leader and who identify their learning needs *Doctors in Training: 2011 Step 1 Study Guide* Brian Jenkins,2011 **Practice Gaps in**

Fiftieth Anniversary, 1912-1962 Institute of Radio Engineers,1962 Tintinalli's Emergency Medicine: A Comprehensive Study Guide, 8th edition Judith E. Tintinalli,J. Stephan Stapczynski,O. John Ma,David M. Cline,Garth D. Meckler,2016-03-22 The most widely used and highly regarded textbook and reference of emergency medicine Endorsed by the American College

of Emergency Physicians The 8th edition of Tintinalli's Emergency Medicine provides the depth and breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine successfully in today's fast-paced environments. It is an important contemporary clinical emergency care resource for physicians, NPs, and PAs who practice emergency medicine and for emergency medicine and pediatric emergency medicine fellows. It remains the preferred study guide for in-training and board examinations and recertification. NEW to this edition: Full color design with more tables than ever to succinctly present key information; Extensive updates to all sections incorporating the latest guidelines, evidence-based protocols, and relevant research; Expanded pediatric section with complete clinical information for general and pediatric emergency physicians; Expanded coverage of common emergency department procedures with improved illustrations; Online access to more than 30 videos covering a wide range of procedural and diagnostic topics and focusing on the latest ultrasound-guided techniques. From the reviews of the seventh edition: Collectively they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last, for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come. JAMA

Intercultural Crisis Communication Christophe Declercq, Federico M.

Federici, 2019-11-14 Intercultural Crisis Communication poses pertinent questions and provides powerful responses to crises that have characterised the modern world since 2010. Language mediation in situations of disaster, emergency, and conflict is an underdeveloped area of scholarship in Translation Studies. This book responds to a clear need for research drawn from practical experiences in the field and explores the crucial role of translation, interpretation, and mediation in contexts of crises. Particular consideration is given to situations where rare or minority languages represent a substantial obstacle to humanitarian operations. Contemporary case studies from the USA, Africa, Europe, and Armenia provide major examples of crisis communication that call for more efficient language mediation. Such examples include Syrian displacement, the refugee crisis in Croatia, and Italy's international terrorism and national public administration interpreting in conflict and for Migrants. Frontiers as well as the integration of refugee doctors for employment in the UK. With contributions from experts in the field, this volume is of international relevance and provides a multifaceted overview of intercultural communication issues and remedies during crises.
