Do Smart Adaptive Systems Exist? Bogdan Gabrys, Kauko Leiviskä, Jens Strackeljan, 2006-07-11 Do Smart Adaptive Systems Exist is intended as a reference and a guide summarising and focusing on best practices when using intelligent techniques and building systems requiring a degree of adaptation and intelligence It is therefore not intended as a collection of the most recent research results but as a practical guide for experts from other areas and industrial users interested in building solutions to their problems using intelligent techniques One of the main issues covered is an attempt to answer the question of how to select and or combine suitable intelligent techniques from a large pool of potential solutions Another attractive feature of the book is that it brings together experts from neural network fuzzy machine learning evolutionary and hybrid systems communities who will provide their views on how these different intelligent technologies have contributed and will contribute to creation of smart adaptive systems of the future

Hybrid Artificial Intelligence Systems Emilio Corchado, Ajith Abraham, 2008-09-30 The Third International Workshop on Hybrid Artificial Intelligence Systems HAIS 2008 presented the most recent developments in the dynamically expanding realm of symbolic and sub symbolic techniques aimed at the construction of highly robust and reliable problem solving techniques Hybrid intelligent systems have become increasingly popular given their capabilities to handle a broad spectrum of real world complex problems which come with inherent imprecision uncertainty and vagueness high dimensionality and non stationarity These systems provide us with the opportunity to exploit existing domain knowledge as well as raw data to come up with promising solutions in an effective manner Being truly multidisciplinary the series of HAIS workshops offers a unique research forum to present and discuss the latest theoretical advances and real world applications in this exciting research field This volume of Lecture Notes on Artificial Intelligence LNAI includes accepted papers presented at HAIS 2008 held in University of Burgos Burgos Spain September 2008 The global purpose of HAIS conferences has been to form a broad and interdisciplinary forum for hybrid artificial intelligence systems and associated learning paradigms which are playing increasingly important roles in a large number of application areas Since its first edition in Brazil in 2006 HAIS has become an important forum for researchers working on fundamental and theoretical aspects of hybrid artificial intelligence systems based on the use of agents and multiagent systems bioinformatics and bio inspired models fuzzy systems artificial vision artificial neural networks optimization models and alike
