Educational Research Material Culture And Its Representation:

Educational Research: Material Culture and Its Representation Paul Smeyers, Marc Depaepe, 2014-02-10 This collection discusses and illustrates how educational research is affected by the economic institutional and physical contingencies of its time and in our time even increasingly is driven by them It is argued that the antidote to this is however not to aspire to thought itself but instead to do justice to its own rootedness in the material including textuality From an historical point of view such an innovative approach can itself revamp the material scholarly culture and the way it is represented The chapters address a variety of topics such as the cultural heritage of the school desk the significance of images for research into long term educational processes the way iconic signs function and how modes of enquiry relate to the materiality of education Attention is also given to standards for reporting on educational research studies and how these limit the scope and communication and moreover shape researchers to the forms of citation practices as substantially influencing methods and content and to the centrality of conversation not just as the means to an end but as what matters further to representational and to non representational theories for educational research Some examples are drawn from the area of arts based educational research from mathematics education and from the discourse on universities **Handbook of Historical**

a source and what this means for the questions contemporary researchers might ask **Folds of Past, Present and Future** Sarah Van Ruyskensvelde, Geert Thyssen, Frederik Herman, Angelo Van Gorp, Pieter Verstraete, 2021-09-07 This volume brings together important theoretical and methodological issues currently being debated in the field of history of education The contributions shed insightful and critical light on the historiography of education on issues of de colonization on the historical development of the educational sciences and on the potentiality attached to the use of new and challenging source material *EDRA; Proceedings of the Annual Environmental Design Research Association Conference* Environmental Design Research Association, 2003 **Public Education in the Russian Socialistic Federation of Soviet Republics** Russian S.F.S.R.
