Embedded Entrepreneurship Institutional Innovation Competition:

Global Entrepreneurship, Institutions and Incentives Zoltán J. Ács, 2015-12-18 This book presents some of Zoltán J. Ács's most important contributions since the turn of the new millennium with a particular intellectual focus on knowledge spillover entrepreneurship. It studies the evolution of global entrepreneurship and pays attention to the role of institutions and the incentives they create for economic agents who become either productive or unproductive entrepreneurs. For productive entrepreneurs, those that create wealth for themselves and for society, the author offers a knowledge spillover theory of entrepreneurship as a new way to help understand the entrepreneurial ecosystem. For those that create wealth only for themselves, the author develops a theory of destructive entrepreneurship that undermines the entrepreneurial ecosystem. The book also presents an explanation of the role of philanthropy in reconstituting wealth to complete the circuits of capital in the theory of capitalist development. Finally, the author examines several public policy issues including immigration and technology transfer. This volume will be required reading for students and scholars of entrepreneurship, economics, and public policy.

The Institutions of the Market Alexander Ebner, Nikolaus Beck, 2008-07-31 Where do markets come from and what drives their evolution? How do organizations cope with the competitive dynamism of markets? What is the role of governance mechanisms in the institutional coordination of markets? In this book, leading social scientists consider these questions and examine the institutional foundations of economic change.

Tourism and Innovation C. Michael Hall, Allan M. Williams, 2019-11-25 This ground-breaking volume on the relationships between tourism and innovation provides an overview of relevant innovation theories and related literatures on entrepreneurship, productivity, regional development, and competitiveness, and their significance to contemporary tourism practices. Innovation is a key concept in business and entrepreneurial studies and the broader social sciences. Yet despite its

policy and academic importance historically little attention has been given to the role of innovation in tourism and the corresponding contribution of tourism related human mobility to regional firm and product innovation This book emphasises that innovation in tourism is much more than a series of technological innovations as important as they are and instead needs to be understood in an economic social and political context with particular stress being placed on the extent to which innovations are shaped by the framework of governance and regulation as well as by institutional factors and activities of individual actors and entrepreneurs It is structured so as to introduce the reader to the overall significance of innovation at various levels and the role that innovation plays in firm and place competition Supported with case studies throughout this book is essential reading for all tourism students
