**Embodying Democracy** S. Birch, F. Millard, M. Popescu, K. Williams, 2002-10-04 *Embodying Democracy* analyzes the politics of electoral reform in eight post communist states including Poland Hungary the Czech Republic Slovakia Romania Bulgaria Russia and Ukraine By exploring the multiple factors that shaped the design of electoral institutions during the first ten years of post communist transition it accounts for an important element of the post communist reform process and illuminates general features of institutional design in post transition states *Electoral Systems and Political Transformation in Post-Communist Europe* S. Birch, 2003-11-25 *Electoral Systems and Political Transformation in Post Communist Europe* assesses the influence of electoral systems on political change in 20 post communist European states The main finding is that electoral institutions have systematic effects on the formation of representative structures Party enabling aspects of electoral laws such as list proportional representation tend to foster popular inclusion in politics and institutionalized party systems whereas politician enabling rules such as single member districts and ballots that allow voters to select individuals often favour the development of weakly structured systems and high levels of popular exclusion from the representative process *The Politics of Electoral Reform in Central Europe since 1989* Jakub Charvát, 2023-11-06 This book on the politics of electoral reform in Central Europe since 1989 explains by whom why and how the electoral rules were changed in Central Europe in the post Communist period Examining the contextual factors affecting underlying and or initiating these changes the book identifies main actors their motivations and other circumstances surrounding the electoral reform processes It further explores their political consequences particularly on proportionality and personalization Based on a detailed analysis of electoral reform processes in Czechoslovakia Czechia Hungary and Slovakia over the past thirty years the book discusses how the politics of electoral reform in Central Europe is mostly driven controlled and decided by politicians with other actors being either overlooked or ignored Finally it argues that most of the cases were imposed by an elite majority with the sole exception of the Czech Republic where the politics of electoral reform were influenced by the intervention of the constitutional court as an external actor The book will appeal to students researchers and scholars of political science interested in a better understanding of electoral politics in general as well as democratic transformation processes and electoral reform in Central Europe **Centre-Right Parties in Post-Communist East-Central Europe** Seán Hanley, Aleks Szczerbiak, 2020-09-10 This is the first book to cover the centre right in post communist Eastern Europe It makes an vital contribution to the broader research agenda on the Central and East European centre right by focusing on one specific question why strong and cohesive centre right formations have developed in some post communist states but not others It also delves into the attempts to develop centre right parties after 1989 in four nations the Czech Republic Hungary Poland and Slovakia The authors of these fresh case studies use a common analytical framework to analyse and provide fascinating insights into the varying levels of cohesion in centre right parties across the region This volume was previously

**Elections by Design** Bryon Moraski,2006 Legislative elections are the defining institution of a representative democracy They determine how the power to govern society is distributed among political actors regardless of whether those actors are political parties ethnic groups or business interests Yet the rules that decide how thousands if not millions of popular votes are translated into a relatively small number of parliamentary seats vary widely across and sometimes within countries Elections by Design based on a skillful blend of statistical analyses and detailed case studies seeks to uncover how electoral rules are chosen within the Russian Federation and by whom To enhance our understanding of electoral system choice Moraski investigates the origins of the legislative electoral systems in the eighty nine regions of the Russian Federation These subnational units serve as a natural experiment by allowing an opportunity to observe the creation of representative institutions in a state transitioning from authoritarian rule The regions also offer a rare glimpse into the dynamics of electoral system choice where political parties do not necessarily guide the decisions Despite the unique qualities of Russia s political transition Elections by Design reveals insights that can be applied to other transitioning states Moraski emphasizes that institutional choice remains a political process despite scholars recommendations that certain electoral systems are better for democracy than others At the same time he shows how electoral system choice at the regional level can frustrate party development and democracy at the national level This study is particularly valuable at a time when American politicians seek to spread the seeds of democracy to areas where people differ along ethnic or religious lines and where a federal framework is needed to bring dissenting interests to the negotiating table      **Principles of Comparative Politics** William Roberts Clark,Matt Golder,Sona Nadenichek Golder,2009 Exploring the debates about political issues that drive current research this text provides a real insight into comparative politics The book looks closely at the work of comparativists and the methods they use      Revolution and Resistance in Eastern Europe Matthew Stibbe,Kevin McDermott,2006-10-01 The history of Eastern Europe during the Cold War is one punctuated by protest and rebellion Revolution and Resistance in Eastern Europe covers these flashpoints from the Stalin Tito split of 1948 to the dramatic collapse of the Berlin Wall in 1989 Covering East Germany Czechoslovakia Hungary Yugoslavia Poland and Romania the authors provide comprehensive critical analysis of the varying forms of dissent in the East European socialist states They take a comparative approach and show how the different movements affected one another Incorporating archival material only accessible since 1989 they discuss

issues such as the diverse manifestations of non conformity among different strata of the population the complex relationship between Moscow and the national Communist Parties the loosening of Soviet control after 1985 and everyday resistance to state authority This book offers a firm grounding in the tumultuous decades of communist rule which is essential to understanding the contemporary politics of Eastern Europe      **Annual Review of Political Science** ,2007 The mission of Annual review of political science is to provide systematic periodic examinations of the field through critical authoritative reviews The comprehensive critical review not only summarizes a topic but also roots out errors of fact or concept and provokes discussion that will lead to new research activity Each review contains title author s key words abstracts review and bibliography      *American Book Publishing Record* ,2003      **The British National Bibliography** Arthur James Wells,2002
