Embodiment Ego Space And Action Carnegie Mellon Symposia On Cognition Series:

Embodiment, Ego-Space, and Action Roberta L. Klatzky, Brian MacWhinney, Marlene Behrmann, 2008-06-20 The majority of research on human perception and action examines sensors and effectors in relative isolation. What is less often considered in these research domains is that humans interact with a perceived world in which they themselves are part of the perceptual representation as are the positions and actions potential or ongoing of other actors. **Conceptual and Interactive Embodiment** Martin Fischer, Yann Coello, 2015-12-22 This two volume set provides a comprehensive overview of the multidisciplinary field of Embodied Cognition. With contributions from internationally acknowledged researchers from a variety of fields, *Foundations of Embodied Cognition* reveals how intelligent behaviour emerges from the interplay between brain, body and environment. Drawing on the most recent theoretical and empirical findings in embodied cognition, Volume 2, *Conceptual and Interactive Embodiment*, is divided into four distinct parts bringing together a number of influential perspectives and new ideas. Part one introduces the field of embodied language processing, before part two presents recent developments in our understanding of embodied conceptual understanding. The final two parts look at the applied nature of embodied cognition, exploring the embodied nature of social coordination as well as the emerging field of artificial embodiment. Building on the idea that knowledge acquisition, retention and retrieval are intimately interconnected with sensory and motor processes, *Foundations of Embodied Cognition* is a landmark publication in the field. It will be of great interest to researchers and advanced students from across the cognitive sciences, including those specialising in psychology, neuroscience, intelligent systems and robotics, philosophy, linguistics and anthropology.

Whispering the Strategies of Language: An Mental Quest through **Embodiment Ego Space And Action Carnegie Mellon Symposia On Cognition Series**
