Geriatrics Models of Care Michael L. Malone,Marie Boltz,Jonny Macias Tejada,Heidi White,2024-05-30 Following the success of the previous edition the second edition of

Geriatrics Models of Care is the definitive resource for systems based practice improvement for the care of older adults. Several new models of care have been published in the last eight years; new outcomes have emerged to better understand the impact of existing models, and with the rise of the Age Friendly Health Systems movement promoting organized efforts to prepare our health care settings for older individuals, it is of more importance than ever. The second edition is organized based on the practice setting along a continuum of care: hospital transitions from hospital to home, outpatient settings, and the emergency department. This book also highlights long term care models, which is an important part of the continuum of care for older Americans. Further, this edition features models that address the needs of vulnerable populations. This new section will describe a spectrum of programs for older adults who have Alzheimer's disease or Parkinson's disease. Other models describe best practices for older adults undergoing surgery or those who want to remain functioning independently in their home. A defining feature of this book is that each chapter follows a standard template: 1 the challenge which led to the model, 2 the patient population served, 3 core components of the intervention, 4 the role of interdisciplinary health professionals, 5 evidence to support the intervention, 6 lessons learned in the implementation and dissemination of the model, 7 implications for family caregivers and communities, particularly underserved and diverse communities, and 8 how each model will provide care across the continuum during an entire episode of care. In addition, each chapter features a call out box with practical tips for implementing the model.

Hospital Case Management Models Karen S. Zander, 2008. The right case management model can make or break your efforts to meet your organization's strategic goals. But how do you find the model that works for your organization, and how can you garner the support you need from your organization's executive team? In this first of its kind resource, case management expert Karen Zander RN MS CMAC FAAN guides you through selecting and implementing a proven model that fits cohesively with your facility's culture in *Hospital Case Management Models: Evidence for Connecting the Boardroom to the Bedside*. Align case management with your organization's top strategic goals. This new book will help you choose a model that aligns with your board's mission. You'll learn how to carry your model through your organization and operationalize it at the bedside through direct patient interaction by case managers and social workers. Plus, you'll get the guidance you need to gain support from your executive team.

Caring and Community Jane S. Norbeck, Charlene Connolly, JoEllen Koerner, 2023-07-03. Although service learning and nursing would seem an obvious combination, nursing as a profession within academic research and health care organizations has only recently begun to embrace the true spirit of the practice. The chapters in this book, fourth in the *Service Learning in the Disciplines Series*, are rich with information, both theoretical and experiential, that describes ways in which nursing has begun to incorporate service learning as a methodology into many diverse settings and with communities of interest.
