Expressibility Problem Efficient Planning Linguistics:

Expressibility and the Problem of Efficient Text Planning Marie Meteer, 2015-12-17 A central problem of natural language generation is that of expressibility Meteer presents a solution which uses a level of representation called the Text Structure an intermediate between the representation of world and the language **Linguistic Issues in Machine**

Translation Frank Van Eynde, 2015-12-17 The key assumption in this text is that machine translation is not merely a mechanical process but in fact requires a high level of linguistic sophistication as the nuances of syntax semantics and intonation cannot always be conveyed by modern technology The increasing dependence on artificial communication by private and corporate users makes this research area an invaluable element when teaching linguistic theory **Handbook of Natural Language Processing** Robert Dale, Hermann Moisl, Harold Somers, 2000-07-25 This study explores the design and application of natural language text based processing systems based on generative linguistics empirical corpus analysis and artificial neural networks It emphasizes the practical tools to accommodate the selected system *Handbook of Discourse Processes* Arthur C. Graesser, Morton Ann Gernsbacher, Susan R. Goldman, 2003-04-02 This Handbook is a comprehensive overview of the multidisciplinary field of discourse processes The editors hope to foster a more interdisciplinary approach to discourse processing with this Handbook while simultaneously developing an appreciation within the field for multiple methods of establishing rigorous scientific claims The field of discourse processes is currently fueled by seven dominant approaches discourse psychology corpus analysis computational discourse discourse technologies conversation analysis hybrid qualitative and quantitative approaches and cultural foundations The contributors also discuss future trends in research including corpus analyses the integration of neuroscience with discourse research and the development of more advanced computer technologies for analyzing discourse **IJCAI-97** International Joint Conferences on Artificial Intelligence, 1997 **Computational Linguistics and Intelligent Text Processing** Alexander Gelbukh, 2003-07-31 This book constitutes the refereed proceedings of the Third International Conference on Intelligent Text Processing and Computational Linguistics CICLing 2002 held in Mexico City Mexico in February 2002 The 44 revised papers presented together with four invited papers were carefully reviewed and selected from a total of 67 submissions The papers are organized in topical sections on semantics word sense disambiguation anaphora syntax and parsing part of speech tagging lexicon and corpus text generation morphology speech spelling information extraction and information retrieval summarization text mining and text classification and categorization document processing and demo descriptions **8th Conference of the European Chapter of the Association for Computational Linguistics** Association for Computational Linguistics. Meeting, Association for Computational Linguistics. European Chapter. Conference, 1997 **Linguistics and Language Behavior Abstracts**, 2008 **User Modelling in Text Generation** Cecile L. Paris, 1993 User modelling is a new area of research on which there is very little existing literature This book seeks to provide information on state of the art

research With reference to a particular generation system TAILOR developed at the Information Science Institute the author demonstrates that a question answering programme can be constructed to tailor its answers to the specific needs or expertise of a particular user Thus several discourse strategies can be combined in a single text and a wider variety of texts can be produced Computational Linguistics ,1995 **Aspects of Automated Natural Language Generation** Robert

Dale,1992 This volume presents the proceedings of the Sixth International Workshop on Automated Natural Language Generation held in Castel Ivano Trento Italy April 5 7 1992 Besides an invited lecture by Nadia Magnenat Thalmann a well known researcher in computer animation on creating and visualizing speech and emotion the volume includes the 17 thoroughly reviewed papers accepted for presentation selected out of the submissions to the Workshop as well as 11 statements contributed to panels on multilinguality and generation or extending language generation to multiple media The accepted papers by leading researchers from Japan North America and Europe fall in sections on generator system architecture issues in realisation issues in discourse structure and beyond traditional generation PUBLISHER S WEBSITE

Proceedings of the Conference Association for Computational Linguistics. Meeting,1998 **Proceedings of the Conferences and Proceedings of the ANLP-NAACL 2000 Student Research Workshop** Association for Computational Linguistics North American Chapter,2000 **Systemic Functional Grammar & Natural Language Generation** Elke Teich,1999-05-11 This volume deals with the computational application of systemic functional grammar SFG for natural language generation In particular it describes the implementation of a fragment of the grammar of German in the computational framework of KOMET PENMAN for multilingual generation The text also presents a specification of explicit well formedness constraints on syntagmatic structure which are defined in the form of typed feature structures It thus achieves a model of systemic functional grammar that unites both the strengths of systemics such as stratification functional diversification and the orientation to context and the kind of syntactic generalizations that are typically found in modern syntagmatically focused computational grammars **Third Conference on Applied Natural Language Processing** ,1992
