Exploring Humanity Intercultural Perspectives On Humanism:

Exploring Humanity Mihai Spărosu, Jörn Rüsen, 2012 The principles and practices of intercultural humanism as an inclusive vision for humanity

The Human and the Humane Christian Høgel, 2015-07-15 In times of conflicts and crises an argument insisting on the humane is commonly heard In wars voices demanding a humane treatment of prisoners as decreed by the Geneva Convention will be raised Opposition to social injustice may be framed in a collected call for a humane society Even educational systems may insist on having a humane perspective among its leading causes Words referring to man humane but also humanistic humanitarian even humanity thus take on status of ideals for mankind Man in common and legal speech thus becomes the conceptual marker of his own perfection The subject of this book is the early history of this linguistic feature and in particular its argumentative use from its starting point till early modern times

Crafting Humans Marius Turda, 2013 This volume is based partly on papers presented at the Berendel Foundation's second annual conference held at Queen's College Oxford between 8 and 10 September 2011

Ka Osi Sọ Onye: African Philosophy in the Postmodern Era Jonathan Chimakonam, Edwin Etieyibo, 2018-02-28 This collection is about composing thought at the level of modernism and decomposing it at the postmodern level where many cocks might crow with African philosophy as a focal point It has two parts part one is titled The Journey of Reason in African Philosophy and part two is titled African Philosophy and Postmodern Thinking There are seven chapters in both parts Five of the essays are reprinted here as important selections while nine are completely new essays commissioned for this book As their titles suggest in part one African philosophy is unfolded in the manifestation of reason as embedded in modern thought while in part two it draws the effect of reason as implicated in the postmodern orientation While part one strikes at what V Y Mudimbe calls the colonising structure or the Greco European logo phallo euro centricism in thought part two bashes the excesses of modernism and partly valorises postmodernism In some chapters modernism is presented as an intellectual version of communalism characterised by the cliché our people say Our thinking is that the voice of reason is not the voice of the people but the voice of an individual The idea of this book is to open new vistas for the discipline of African philosophy African philosophy is thus presented as a disagreement discourse Without rivalry of thoughts Africa will settle for far less This gives postmodernism an important place perhaps deservedly more important than history of philosophy allocates to it It is that philosophical moment that says philosophers must cease speaking like gods in their hegemonic cultural shrines and begin to converse across borders with one another In this conversation the goal for African philosophers must not be to find final answers but to sustain the conversation which alone can extend human reason to its furthest reaches

[Multiple Experiences of Modernity](#) Oliver Kozlarek, 2014

Contemporary theories of modernity recognize the plurality or multiplicity of modernities Often the differences are seen as institutional or cultural differences Although this sort of research is important it cannot be ignored that it does not provide a clear understanding of the human consequences The tradition that today is known under the name of Critical Theory on the

contrary has been interested always first of all in the human consequences This book wants to follow this ambition The question it tries to search answers for is what are the experiences that human beings are making in and within global modernity Another question is important what are the affinities and what are the differences Also Critical Theory was mainly interested in the Western experiences with and within global modernity The book will challenge this limited view by looking how modernities is experienced in other parts of the world Ofollowing the tradition of critical theory the volume enquires into the experiences people make with and in global modernity It thereby seeks to draw attention to both affinities and differences in these experiences and to depart from the western horizon of experience and consider other forms of experience Current theories of modernity are based on the assumption of the diversity of modernity This diversity is frequently understood to be the outcome of institutional and cultural differences

The Origins of Anti-Authoritarianism

Nina Witoszek, 2018-10-31 This book discusses the ongoing revolution of dignity in human history as the work of humanist outliers small groups and individuals dedicated to compassionate social emancipation It argues that anti authoritarian revolutions like 1989 s Autumn of the Nations succeeded in large part due to cultural and political innovations springing from such small groups The author explores the often ingenious ways in which these maladapted and liminal outliers forged a cooperative and dialogic mindset among previously resentful and divided communities Their strategies warrant closer scrutiny in the context of the ongoing 21st century revolution of dignity and efforts to re unite an ever more troubled and divided world The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
