Eyetracking Web Usability Eyetracking Web Usability:

Eyetracking Web Usability Jakob Nielsen, Kara Pernice, 2010-04-26 Eyetracking Web Usability is based on one of the largest studies of eyetracking usability in existence Best selling author Jakob Nielsen and coauthor Kara Pernice used rigorous usability methodology and eyetracking technology to analyze 15 million instances where users look at Web sites to understand how the human eyes interact with design Their findings will help designers software developers writers editors product managers and advertisers understand what people see or don't see when they look and why With their comprehensive three year study the authors confirmed many known Web design conventions and the book provides additional insights on those standards They also discovered important new user behaviors that are revealed here for the first time Using compelling eye gaze plots and heat maps Nielsen and Pernice guide the reader through hundreds of examples of eye movements demonstrating why some designs work and others don't They also provide valuable advice for page layout navigation menus site elements image selection and advertising This book is essential reading for anyone who is serious about doing business on the Web

Eye Tracking In Web Usability: What Users Really See Farrukh Jabeen, 2011 Computer Science Thesis

A Quantitative Approach for Web Usability Using Eye Tracking Data López-Orozco and Florencia-Juárez, 2018 This chapter presents a relatively new approach to show how a web usability classical paradigm can benefit from quantitative data of a nonclassical approach In the pilot stage we used experimental eye tracking data acquired from 11 participants faced to a web page to perform three simple tasks Results show advantages by using eye tracking data to identify and verify some usability problems of such a web page In this chapter some hints are presented for people interested in measuring web usability by using such an approach However a deeper study should be carried out in order to generalize our results toward the construction of a methodology to be followed by a web developer or interested people in such a field of research

Advances in Digital Technologies J. Mizera-Pietraszko, R. Rodriguez Jorge, D.M. Almazo Pérez, 2017-07-25 Web technology is ubiquitous in modern life enabling various forms of communication in real time between the users and computers as well as between network devices by means of artificial markup languages and cascading style sheets CSS Multimedia packages implemented in the WWW can also further expand the user groups to include for example the amblyopic or the hearing impaired According to Microsoft Web technology also encompasses Web servers and programming languages for building Web applications But such a breathtaking development that meets dynamically changing new emerging networking standards demands a large scale infrastructure that will enable us to access digital information in its every form whatever its purpose This book presents 20 papers and 3 keynote speeches from the 8th International Conference on Applications of Digital Information and Web Technologies ICADIWT 2017 held at the Universidad Autónoma de Ciudad Juárez City Chihuahua Mexico in March 2017 Over the years the ICADIWT conference has created its own research community of participants from many countries who attend the event each year to demonstrate
